

CourseCARD

Introduction

This course is designed to provide students with a comprehensive understanding of the principles and practices of project management. The course covers the entire project lifecycle, from initiation to closure, and includes practical applications and case studies.

Course Objectives

By the end of this course, students will be able to:

- Identify the key components of a project and the roles of the project manager.
- Develop a project charter and a project management plan.
- Execute project tasks and manage resources.
- Monitor project progress and control risks.
- Close a project and evaluate its performance.

Topics

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

Prerequisites

Students should have a basic understanding of business and management principles. No prior experience in project management is required.

Materials

Students will need access to a computer and internet connection. Recommended textbooks and resources are listed in the syllabus.

Methodology

The course uses a combination of lecture, case studies, group exercises, and practical projects to facilitate learning.

Assessment

Students will be assessed through a combination of quizzes, assignments, and a final project. The final project will be a comprehensive project plan for a real-world scenario.

Course Details
