Communication and Environment: Sustainability and Risks (Penerbit USM) Hamidah Abd. Hamid,Azman Azwan Azmawati,Jamilah Hj. Ahmad,Nik Norma Nik Hasan,2014-11-25 There is a dearth of literature on environmental communication within the non western world The few existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted discussions on how

sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia Penerbit Universiti Sains Malaysia

Ethics and Justice for the Environment Adrian C. Armstrong, 2012 Examining the issues of ethics and justice as they apply to the environment this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution It grew out of the US civil rights movement the liberal tradition of rights and Rawls description of justice as fairness It is thus almost exclusively anthropocentric and does not address the question of justice for the environment By contrast environmental ethical studies are a wide ranging collection of approaches that are concerned with caring for the earth and the justifications for it but rarely consider the issue of justice Although the two movements do not come together at the theoretical level they do so at the grass roots activist level An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches particularly based on the capability ideas of justice developed by Martha Nussbaum

Values-Centered Entrepreneurs and Their Companies David Y. Choi, Edmund Gray, 2010-09-03 A new brand of entrepreneurs has arrived on the business scene carrying with them a whole new set of values They possess a sense of mission to be socially responsible protect the planet and do the right thing for all of their stakeholders Rather than focus exclusively on financial gain they aim to achieve a balance between profits and one or more causes of their choosing In fact they view for profit entrepreneurship as a vehicle for social change The authors call these pioneers values centered entrepreneurs Some of the values centered entrepreneurs have been around a few decades In recent years however the numbers have proliferated and the nascent movement has started to make a true impact These entrepreneurs approach to management questions our basic assumptions about how businesses should be run and what their role should be in society Several of these entrepreneurs have attained high visibility Yvon Chouinard of sportswear manufacturer Patagonia has been a role model for integrating environmental protection to every aspect of Patagonia's business operation Howard Schultz of Starbucks has been able to build one of the strongest brands in the world while being the first retailer to offer comprehensive health benefits and stock options to its part time employees Paul Newman legendary actor and racecar driver as well as a leading maker of salad dressings gives 100% of Newman's Own brand's profits to charity This book explores how these highly unorthodox leaders

have built their profitable and socially responsible business enterprises and what lessons can be learned for the next generation of entrepreneurs The authors examine a group of over 40 entrepreneurial companies and how each balanced the profit objective with social responsibility in key aspects of their business operation from their initial company formation through growth to exit to build successful triple bottom line companies Choi and Gray particularly focus on how these firms commitment to values affected their company missions hiring and organizational policies marketing strategies financial practices exit options and giving programs and vice versa In some cases the authors find that the entrepreneurs social objectives have actually strengthened not weakened their business enterprises Based on their extensive studies of these companies the authors have distilled a set of commonalities The book presents ten of the most dominant and interesting of these commonalities with a focus on those policies and decisions that appeared to depart from conventional business practice In addition to devoting chapters to each of the core principles learned from these companies the authors also include in depth case studies of four of the ventures featured in their study
