Cow For Hansel:

A Cow for Hansel Ernie Holyer, 1967 **Regulation of Ovarian and Testicular Function** Virendra B. Mahesh, Dharam S. Dhindsa, Everett Anderson, Satya P. Kalra, 2012-12-06 Rapid advances have taken place in various aspects of reproductive biology during the last decade. These advances have centered around several organ systems that comprise the reproductive system and encompass molecular events and structure function relationships. It becomes important to review these advances in knowledge at periodic intervals with respect to feedback systems and regulatory loops that control reproductive processes in vivo. Towards this end, a workshop entitled Functional Correlates of Hormone Receptors in Reproduction sponsored by the National Institute of Child Health and Human Development and the Reproductive Biology Study Section of the Division of Research Grants, National Institutes of Health, was held in October 1980. The proceedings of the workshop were published by Elsevier Biomedical, New York. This workshop was followed by two workshops sponsored by the Reproductive Biology Study Section of the Division of Research Grants, National Institutes of Health, entitled Role of Peptides and Proteins in Control of Reproduction in February 1982 and published by Elsevier Biomedical, and Molecular and Cellular Aspects of Reproduction in October 1985 and published by Plenum Press. It was therefore timely to review the current state of knowledge regarding the regulation of ovarian and testicular function by bringing together scientists working in separate and discrete aspects of reproduction to review the functional implications of their research on the regulation of function within the same tissue and also in relationship to feedback systems and regulatory loops with other tissues. **The Use of Prostaglandin F₂[α] as a Basis for Estrus Control in Cattle** David Mark Tobey, 1975 **Reproduction in the Female Mammal** George Eric Lamming, Emmanuel C. Amoroso, 2013-12-14 **Kobo** Richard Allen, 2025-03-31 Kobo, a 14-year-old boy, is the pampered pet of two grobs on the planet Pavin, near the center of the Milky Way galaxy, whose ancestors were brought to Pavin millennia before and domesticated as pets. Kobo, like other humans on Pavin, is raised largely in isolation from other humans and therefore without language or culture. Soon, his grobs acquire a companion for Kobo, a 15-year-old girl named Ra. The pair have two babies, both of whom are sold as toddlers to other grobs. When the second is sold, Kobo attacks the male grob with a knife, and he and Ra are separately transported to the planet Loma in the Pavin system, where humans work as slaves in the mines. The story follows Kobo and Ra as they learn to communicate, work in the mines, and discover a community of humans hiding from the grobs. About the Author: Richard Allen is a lawyer who lives with his wife and their yellow and chocolate Labrador retrievers in Crested Butte, Colorado. A long-time fan and former teacher of science and speculative fiction, his love of pets led him to wonder what humans would be like in similar circumstances and to write this book. Allen's other interests include the law; he has argued ten cases in the Supreme Court and taught courses on the Constitution, the Supreme Court, and criminal justice, as well as history, playing the guitar and harmonica, while his dogs howl along, chess, and most other games and outdoor sports of all kinds. This is his first published novel. **A Review of a Reproductive Performance of Female**
