Justice and Cities Mark Davidson, 2023-06-20 This book explores different theories of justice and explains how these connect to broader geographical questions and inform our understanding of urban problems Since philosophers like Socrates debated in the ancient agora cities have prompted arguments about the best ways to live together Cities have also produced some of the most vexing moral problems including the critical question of what obligations we have to people we neither know nor affiliate with The first part of this book outlines the most well developed answers to these questions the justice theories of Utilitarianism Libertarianism Liberalism Marxism Communitarianism

Conservatism and recent post critiques Within each theory we find a set of geographical propensities that shape the ways purveyors of the theories see the city and its moral problems The central thesis of the book is therefore that competing moral theories have distinct geographical concerns and perspectives and that these propensities often condition how the city and its injustices are understood The second part of the book features three studies of contemporary urban problems gentrification segregation and un affordability to demonstrate how predominant justice theories generate distinctive moral and geographical interpretations This book therefore serves as an urbanist s guide to justice theory written for undergraduates and postgraduates studying human geography urban and municipal planning urban theory and urban politics sociology and politics and government **Multispecies Thinking in the Classroom and Beyond** Patty Born,2024-02-02
