All About Opposites:

Everything in Everything Anna Marmodoro, 2017 Anaxagoras of Clazomenae 5th century BCE is best known in the history of philosophy for his stance that there is a share of everything in everything He puts forward this theory of extreme mixture as a solution to the problem of change he and his contemporaries inherited from Parmenides that what is cannot come from what is not and vice versa Yet for ancient and modern scholars alike the metaphysical significance of Anaxagoras's position has proven challenging to understanding In *Everything in Everything* Anna Marmodoro offers a fresh interpretation of Anaxagoras's theory of mixture arguing for its soundness and also relevance to contemporary debates in metaphysics For Anaxagoras the fundamental elements of reality are the opposites hot cold wet dry etc which Marmodoro argues are instances of physical causal powers The unchanging opposites compose mereologically forming phenomenologically emergent wholes Everything in the universe except nous derives from the opposites The opposites exist as endlessly partitioned they can be scattered everywhere and be in everything Marmodoro further shows that their extreme mixture is made possible by the omni presence and hence com presence in the universe which is in turn facilitated by the limitless divisibility of the opposites Anaxagoras tackles the logical consequences of the limitless divisibility of the elements He is the first ante litteram gunk lover in the history of metaphysics He also has a unique conception of non material gunk and a unique power ontology which Marmodoro refers to as power gunk Marmodoro investigates the nature of power gunk and the explanatory utility of the concept for Anaxagoras for his theory of extreme mixture Whilst most defenders of an atomless universe nowadays argue for material gunk as a conceptual possibility only Anaxagoras argues for power gunk as the ontology of nature

The Neutral One Glen Carl Cutlip, 2001-01-11 The Neutral One is what we are at the core of being the reconciliation of the seeming opposites of being The Neutral One represents the Christ Self the Sun of Righteousness the Day star Although we cannot say what the Neutral One is we Can We can by saying and not saying what it is at the same time To describe the indescribable we must do so without doing so The Neutral One is what it is and what it is not too in reconciliation The Neutral One is that which is with us always from everlasting to everlasting without beginning or end It is the beginning and the end of all things without being either for it is ever before and after itself as two parts of the same thing The Neutral One is the living Christ that reconciles all things of heaven and earth unto one and delivers that unto God that God may be realized to be indeed the all in all dwelling in all

book investigates the thought of two of the most influential philosophers of antiquity Plato and his predecessor Anaxagoras with respect to their metaphysical accounts of objects and their properties Marmodoro introduces a fresh perspective on these two thinkers ideas showing Plato's theory to be indebted to Anaxagoras's and principally arguing that their core metaphysical concept is overlap overlap between properties and objects in the world She contends that Plato initially endorses Anaxagoras's model of constitutional overlap but subsequently develops his own model of qualitative overlap Overlap is the crux of our understanding of how for Plato objects participate in Forms of how objects are related without relations of the role of Forms as causes and more Marmodoro's interpretation shows Plato to be ground breaking in his understanding of structure as a property in his explanation of composition and in his account of metaphysical emergence
