The telephone story

It was 88 years ago that Alexander Graham Bell spoke into a strange-looking device that became the world's first telephone.

Between Bell's primitive instrument and today's far-reaching Bell telephones have been countless refinements in the art of communications.

Western Electric, the manufacturing unit of the Bell System since 1885, then is now, made the most advanced phones of the day... as well as wire, cables, instruments and many other things needed for a reliable, continuously improving and more economical communications system.

Today there are 70 million Bell telephones in the land, and each phone must be able to reach any other quickly and easily. This requires literally billions of separate parts working perfectly together as one unified coordinated system.

That such a system does in fact exist is the result of close teamwork between Bell System engineers, Bell Telephone Laboratories, Western Electric, and your Bell telephone company. In working together, we share the responsibility and common goal of bringing you the world's most modern, most dependable telephone service at the cost.

activity of telling anyone anything The Production and Distribution of Knowledge in the United States then revealed the new and startling shape of the U S economy Machlup s cool appraisal of the data showed that the knowledge industry accounted for nearly 29 percent of the U S gross national product and that 43 percent of the civilian labor force consisted of knowledge transmitters or full time knowledge receivers Indeed the proportion of the labor force involved in the knowledge economy increased from 11 to 32 percent between 1900 and 1959 a monumental shift Beyond documenting this revolution Machlup founded the wholly new field of information economics The transformation to a knowledge economy has resonated throughout the rest of the century especially with the rise of the Internet As two recent observers noted Information goods from movies and music to software code and stock quotes have supplanted industrial goods as the key drivers of world markets Continued study of this change and its effects is testament to Fritz Machlup s pioneering work Federal Register ,1995-12 Hearing Aid Compatibility Act of 1987 United States.
