A Brief History of the Relationship Between Confucianism, Daoism, and Buddhism Zhongjian Mou, 2023-01-01 Chinese traditions of Confucianism Daoism and Buddhism have a profoundly philosophical dimension The three traditions are frequently referred to as three paths of moral teachings In this book Mou provides a clear account of the textual corpus that emerges to define each of these traditions and how this canonical axis was augmented by a continuing commentarial tradition as each generation reauthorized the written core for their own time and place In his careful exegesis Mou lays out the differences between the more religious reading of these traditions with their defining practices that punctuate the human journey through life and the more intellectual and philosophical treatment of the texts that has and continues to produce a first order culture of annotation that become integral to the traditions themselves At the center of the alternative religious experience reflected throughout the teachings of Confucianism Daoism and Buddhism is the project of personal cultivation as it comes to be expressed as robust growth in family and communal relations For Mou these three highly distinctive and yet complementary ways of thinking and living constitute a kind of moral ecology wherein each of them complements the others as they stand in service to a different dimension of the human need for an educated spirituality

Hidden Multilingualism in 19th-Century European Literature Jana-Katharina Mende, 2023-08-21 The disparagement of multilingualism is a European development of the 18th and 19th centuries in which one national language and national literature were advocated established and institutionalised Multilingual writers made use of the creative potential of several languages even then However they often adapted to an increasingly monolingual book market which made their individual multilingualism invisible This is evident in literary historiography which established a monolingual national canon Researching hidden multilingualism is often difficult since multilingual texts by multilingual writers were often not published or were published in a monolingual version sources are scarce Literary histories of the time often do not mention multilingualism Furthermore many multilingual writers were members of minority groups women Jewish Non European and thus often neglected The volume offers methods and theories

to systematically approach this hidden material as well as case studies on authors and national literatures in a multilingual context It thus contributes to the restructuring of a multilingual transnational literary history that is applicable to different philologies
