Essentials of Smart Parenting Carl Guy Arinoldo, Linda D. Arinoldo, 2007. On the surface, parenting seems pretty simple: a parent has to follow the path of his or her parents, which produced such a wonderful gift to mankind as himself or herself. As soon as this path fails, they turn to the Internet or to the myriad shelves of books devoted to parenting in book shops. As soon as that fails, their hair turns prematurely silver or falls out; they go into mid-life crises and generally blame the lack of desired result on the corrosive influence of the other spouse. This newest addition to the literature presents something different: smart parenting. It could have been called *Thinking Person's Guide to Parenting* as well, because that is what it is. It is a book which lays out the essentials of this most perplexing, happy, sad, and sometimes scary human endeavour.

Managing Stakeholder Expectations for Project Success Ori Schibi, 2013-10-13. *Managing Stakeholder Expectations for Project Success* provides a practical approach to managing those things that matter most for project success: stakeholder expectations, communication, risk, change, and quality, so that scope, schedule, and cost end up on target and the project's intended benefits for the organization are realized. This unique desk reference shows how to utilize the best practices, concepts, and methodologies found in PMI's PMBOK Guide, along with a few concepts from APMG's PRINCE2, and leverage them in the context of organizational challenges and project realities. It features new methods for successful project management that focus on understanding and managing stakeholders' needs and expectations, communication, time management, and organizational politics and culture. The book's content and design also make it a valuable resource for PMP certification. J Ross Publishing offers an add-on at a nominal cost: downloadable, customizable tools, presentations, and templates ready for immediate implementation.
