Smith, 2017-11-30 Alan Smith s Allenby s Gunners tells the story of artillery in the highly successful World War I Sinai and Palestine campaigns Following Gallipoli and the reconstitution of the AIF a shortage of Australian gunners saw British Territorial artillery allotted to the Australian Light Horse and New Zealand Mounted Rifle brigades It was a relationship that would prove highly successful and Allenby s Gunners provides a detailed and colorful description of the artillery war cavalry and infantry operations from the first battles of Romani and Rafa through the tough actions of Gaza the Palestine desert Jordan Valley and Amman to the capture of Jerusalem The story concludes with the superb victory of Megiddo and the taking of Damascus until the theater armistice of 1918 Smith Covers the trials and triumphs of the gunners as they honed their art in one of the most difficult battlefield environments of the war The desert proved hostile and unrelenting testing the gunners their weapons and their animals in the harsh conditions The gunners adversary the wily and skillful Ottoman artillerymen endured the same horrendous conditions and proved a tough and courageous foe The light horsemen and gunners also owed much to the intrepid airmen of the AFC and RFC whose tactical and offensive bombing and counter battery work from mid 1917 would prove instrumental in securing victory This is an aspect of the campaign that is

seamlessly woven throughout as the action unfolds The Sinai and Palestine campaigns generally followed a pattern of heavy losses and setbacks for an initial period before allied forces eventually prevailed This is a highly descriptive volume that tells and oft neglected story and fills the gap in the record of a campaign in which Australians played a significant role It is a welcome addition to the story of the Australians in the Middle Eastern campaigns of World War I **Orchestrating**

Warfighting Tim Bean,Edward Flint,James E. Kitchen,Paul Latawski,2024-09-10 Orchestrating Warfighting provides a detailed and wide ranging examination of the employment of corps and divisions from the First World War through to the early twenty first century Division and corps formations have been at the forefront of the British Army s prosecution of war since 1914 They constituted the major command and organisational elements that underpinned the conduct of large scale warfighting on land Divisions and corps were of central importance to the conduct of the First and Second World Wars the maintenance of a conventional deterrence posture during the Cold War and were also employed in major confrontations since 1945 including the Korean War and two Gulf Wars The British Army of the early twenty first century still retains two divisional formations alongside the British led Allied Rapid Reaction Corps within NATO Orchestrating Warfighting examines British Dominion and imperial corps and divisions taking part in the total wars of the first half of the twentieth century and smaller scale conflicts since 1945 It throws new light on questions of command generalship and the management of battles and campaigns across a diverse range of theatres Orchestrating Warfighting is of interest to historians of the British Army operational military history and modern war **Camp and Combat on the Sinai and Palestine Front** E. Woodfin,2012-05-29

Dunes sandstorms freezing crags and searing heat these are not the usual images of World War I For many men from all over the British Empire this was the experience of the Great War Based on soldiers accounts this book reveals the hardships and complexity of British Empire soldiers lives in this oft forgotten but important campaign **Religious Humanitarianism**

during the World Wars, 1914-1945 Patrick J. Houlihan,2024-06-30 The history of modern war has focused on destruction however practices of saving lives and rebuilding societies have received far less scrutiny The world wars reconfigured geopolitics on a sacred secular spectrum dominated by the USA and the USSR In these events the motivations of humanitarian actors are disputed as either secular or religious evoking approval or censure Although modern global humanitarianism emerged during the world wars it is often studied in a Euro centric framework that does not engage the conflicts globality The effects of humanitarianism during the Second World War look toward the post 1945 era with not enough reflection on the pre 1945 history of humanitarianism Thus what is needed is a critical history beyond moralizing bringing synchronic and diachronic expansion to study questions of continuity and change A global history of religious humanitarianism during both world wars places faith based humanitarianism on a spectrum of belief and unbelief **Allenby** C. Brad Faught,2020-06-25 Edmund Allenby Viscount Allenby of Megiddo and Felixstowe as he became later was the principal British military figure in the Middle East from 1917 to 1919 He fulfilled a similar proconsular role in Egypt from the

latter year until 1925 In these two roles Allenby's eight years in the Middle East were of great impact and in probing his life an especially revealing window can be found through which to observe closely and understand more fully the history that has resulted in the terminal roil afflicting the Middle East and international affairs today In this biography Brad Faught explores the events and actions of Allenby's life examining his thinking on both the British Empire and the post World War I international order Faught brings clarity to Allenby's decisive impact on British imperial policy in the making of the modern Middle East and thereby on the long arc of the region's continuing and controversial place in world affairs Britons and their Battlefields Ian Atherton, 2024-08-19 While much attention has been paid to the commemoration of conflict in the twentieth century this book is the first to consider conflict memory in the long term arguing that modern practices were not created out of the mud of the trenches but evolved from much longer practices From the fourteenth century to the present day this work analyses the changing commemoration and memories of British battlefields at home and overseas from Bannockburn 1314 to Bosworth 1485 to Basra 2003 9 Across these seven centuries there has been a series of recurring post battle rituals that have shaped and continue to shape memories of conflict Three distinct but overlapping periods of memory can be delineated In the later Middle Ages battlefields were consecrated by the burial of the fallen and often by the erection of a battlefield cross or chapel or chantry to pray for the dead The second phase began with the Protestant Reformation in the 1530s when pilgrimage and prayers for the dead were abolished and battlefield chantries were dissolved and many battlefield crosses were demolished Memories shifted from the dead to the living especially the bodies of surviving veterans who commemorated the conflict by their wounds and from soil and stone to print and ink The third phase began in the eighteenth century when antiquaries and others established new monuments on past battlefields Monuments to survivors and the dead were established on contemporary battlefields such as Waterloo once again hailed as sacred ground hallowed by bloodshed fit destinations for a pilgrimage Not just officers but ordinary soldiers began to be memorialized by name on the battlefield culminating in the cult of the names of the dead enshrined by the creation of the War Graves Commission in 1917 and the idea that battlefields should be preserved unchanged as seen in modern heritage management Drawing on a wide variety of literary and historical sources and taking a uniquely longue dur e approach the book explores and links memory making practices from across the period to reconsider the ways in which battlefields are commemorated and re commemorated In so doing it makes a unique contribution to a wide range of historiographical fields British history since the fourteenth century memory studies heritage studies landscape history conflict archaeology and military history **The 20th Century A-GI** Frank N. Magill, 2013-05-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works

of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

The British Imperial Army in the Middle East James E. Kitchen, 2014-01-16 The First World War has often been understood in terms of the combat experiences of soldiers on the Western Front; those combatants who served in the other theatres of the war have been neglected. Using personal testimonies, official documentation and detailed research from a diverse range of archives, *The British Imperial Army in the Middle East* explores the combat experiences of these soldiers. The army that fought the Ottoman Empire was a multinational and multi-ethnic force drawing personnel from across Britain's empire, including Australia, New Zealand and India. By taking a transnational and imperial perspective on the First World War, this book ensures that the campaigns in Egypt and Palestine are considered in the wider context of an empire mobilised to fight a total and global war.

Cultural Landscapes of Israel Aviad Sar Shalom, Yuval Peled, Rachel Singer, Irit Amit-Cohen, Rafi Rich, Avraham (Avi) Sasson, Elissa Rosenberg, 2024-01-22 This book introduces an inventory of proposed cultural landscapes in Israel which have been identified, researched and mapped by the Israel Nature and Parks Authority. The categories as defined by the Operational Guidelines of the World Heritage Convention are used to classify the cultural landscapes and provide a framework to determine their significance on a global, regional and local scale. This volume explains the local planning framework and highlights the present complexities in a local context. A number of innovative case studies on the management of sites illustrate how it is possible to bring a range of stakeholders together with public participation, ensuring that appropriate decisions are made regarding the steps necessary for the future of cultural landscapes in Israel. This book appeals to planners and heritage conservationists equally, as to students and post-graduates in the fields of landscape planning and architecture, geography, archaeology and many related areas.

Allenby's Military Medicine Eran Dolev, 2007-07-20 Allenby's Military Medicine examines a little-known feature of World War I as it was fought in the Middle East: the contribution made by the practice of military medicine to the success of the Egyptian Expeditionary Force. In stark contrast with operations in the Boer War and some other First World War theatres of combat, which Eran Dolev describes as medical disasters, the Palestine Campaign was marked by efficient and effective medical service. Dolev describes how this great achievement was inspired by General Allenby's uniquely attentive attitude towards the health of the troops and to military medicine. This is especially seen in the crucial area of fighting epidemic diseases like malaria, a major threat to a healthy fighting force at the time. Dolev also describes the general developments in military medical organisation and surgery on the battlefield during these campaigns. The author's extensive and original research into military medicine is incorporated into an account of the campaign itself, demonstrating the degree to which the army's success depended on its medical support. The story of military medicine during the Palestine Campaigns is a story of exemplary relations between the command and the doctors in the field. The challenges they faced and their response constitute an exceptional chapter in the history of military medicine during the Great War.
