[June 1940, Great Britain and the First Attempt to Build a European Union](#)

Andrea Bosco, 2016-06-22 June 2016 represents a significant moment in British history The decision to leave the European Union at the most critical period since its existence could bring unpredictable and far reaching consequences both for the United Kingdom and the Union itself June 1940 was also a turning point in British history On the afternoon of 16 June a few hours before the French Government opted for the capitulation Churchill made on behalf of the British Government an offer of indissoluble union When a sceptical Churchill put forward to the British Cabinet the text of the declaration drafted by Jean Monnet Sir Arthur Salter and Robert Vansittart he was surprised at the amount of support it received The Cabinet adopted the document with some minor amendments and de Gaulle who saw it as a means of keeping France in the war telephoned Reynaud with the proposal for an indissoluble union with joint organs of defence foreign financial and economic policies a common citizenship and a single War Cabinet The proposal however never reached the table of the French Government The spirit of capitulation embodied in Weygand and P tain prevailed and France submitted herself to the German will for the second time in seventy years After the Munich crisis Great Britain had to face the danger of another European war with the inevitable loss of the Empire and it was at this point that the country first began to favour the application of the federalist principle to Anglo French relations In this conversion to federalism a fundamental role was played by the Federal Union the first federalist movement organised on a popular basis The contribution of Federal Union to the development of the federal idea in Great Britain and Europe was to express and organise the beginning of a new political militancy and it represented the first step of a historical process the overcoming of the nation State the modern political formula which institutionalises the political division of mankind This study principally examines the first eighteen months of the Federal Union during which

time it was able to raise itself to the attention of the general public and the political class as the heir of the League of Nations Union The research is based on extensive unpublished archival material found across the globe from London Oxford Brighton and Edinburgh to Washington Paris and Geneva

Russia's World Order Paul Robinson, 2025-04-15 Russia's World Order explores the ideas underlying the undeclared New Cold War between Russia and the West The first Cold War was a struggle between capitalism and communism most Western politicians and policymakers imagine the new one to be a struggle between democracy and autocracy Russia's World Order explains that in Russian eyes the conflict is about something very different it is a fight between two incompatible visions of where history is leading Russia's World Order describes the civilizational theory that has come to dominate Russian official discourse and that has come to dominate Russian official discourse and that is being used by the Russian state to justify its clashes with the West Whereas the West promotes a vision of history that drives all nations toward convergence on a single social political and economic model that of modern Western liberalism Russia's political leaders increasingly portray the world as consisting of numerous distinct civilizations each diverging toward its own unique destination The Russian state portrays itself as defending the right of all civilizations to chart their own independent path of development and is having some success in using this logic to win allies around the world Paul Robinson recounts how ideas of inevitable convergence once dominated Russian thought as well but were gradually pushed out by civilizational theories He outlines where these theories came from what they propose and how they became popular Russia's World Order thereby reveals the true nature of today's New Cold War and the challenge that Russian civilizationism poses to the West

Semiotic Approach to the Theology of Inculturation Cyril Orji, 2017-08-31 A Semiotic Approach to the Theology of Inculturation argues that though it is a difficult and delicate task inculturation is still a requisite demand of a World Church and that without it the Church is unrecognisable and unsustainable The book also suggests that the past failures of inculturation experiments in Africa can be overcome only by critically applying the science of semiotics which can serve as an antidote to the nature of human knowing and reductionism that characterised earlier attempts to make Christianity African to the African Drawing from the semiotic works of C S Peirce Clifford Geertz and Bernard Lonergan Cyril Orji shows why semiotics is best suited to an African theology of inculturation and offers ten pinpointed precepts identified as Habits which underline the attentiveness reasonableness and responsibility required in a semiotic approach to a theology of inculturation The Habits are also akin to the imperatives inherent in the notion of catholicity that catholicity is not identified

with uniformity but with reconciled diversity and also that catholicity demands different forms in different places times and cultural settings

The Idea of Decline in Western History Arthur Herman, 2010-06-15 Historian Arthur Herman traces the roots of declinism and shows how major thinkers past and present have contributed to its development as a coherent ideology of cultural pessimism From Nazism to the Sixties counterculture from Britain's Fabian socialists to America's multiculturalists and from Dracula and Freud to Robert Bly and Madonna this work examines the idea of decline in Western history and sets out to explain how the conviction of civilization's inevitable end has become a fixed part of the modern Western imagination Through a series of biographical portraits spanning the 19th and 20th centuries the author traces the roots of declinism and aims to show how major thinkers of the past and present including Nietzsche DuBois Sartre and Foucault have contributed to its development as a coherent ideology of cultural pessimism

Saving the European Union from its Illiberal Member States András Jakab, Lando Kirchmair, 2025-03-29 In the last decade at least two European Union EU member states have deteriorated from fragile liberal democracies to illiberal regimes This deterioration not only includes key elements of the rule of law but also mechanisms of democratic accountability have eroded While the cause is an unfortunate combination of factors post socialist EU member states are particularly likely to embrace an illiberal cause Saving the European Union from its Illiberal Member States aims to show that inherited cultural patterns from socialism and even earlier in the form of informal practices and narratives are a largely underestimated source of illiberalism Initially the book diagnoses an unfortunate dynamic of mutual poisoning existing vulnerabilities and weaknesses of democracy and the rule of law at the level of EU law are exacerbated by illiberal member states and vice versa The crisis of illiberal regimes is shown to be a symptom of the EU's own constitutional malaise Authors András Jakab and Lando Kirchmair aim to offer antidotes to this mutual affliction highlighting areas of EU law that have been neglected Chapters examine whether an epistemological tool such as the EU Justice Scoreboard could be adapted to identify illiberal elements The authors also argue that the protection of fundamental rights needs to be strengthened through the completion of the European Fundamental Rights Union Finally the book states that the Spitzenkandidaten system needs to be further strengthened and stabilised for the long term not only to ensure the democratic accountability of the Commission but also because this has the potential to bring the Commission's hitherto undecided and hesitant stance closer to that of the European Parliament

Unconscious Christian Kerslake, 2007-03-08 By the end of the twentieth century it had been almost forgotten that the Freudian account of the unconscious was only one of many to have emerged from the intellectual ferment of the second half of the 19th century The philosophical roots of the concept of the unconscious in Leibniz Kant Schelling and Schopenhauer had also been occluded from view by the dominance of Freudianism From his earliest work of the 1940s until his final writings of the 1990s Gilles Deleuze stood at odds with this dominant current rejecting Freud as sole source for ideas about the unconscious This most contemporary of French philosophers acted as custodian of all the ideas that had been rejected by the proponents of the psychoanalytic model carefully preserving them and when possible injecting them with new life In 1950s and 60s Deleuze turned to Henri Bergson's theories of memory and instinct and to Carl Jung's theory of archetypes In Difference and Repetition 1968 he conceived of a differential unconscious based on Leibnizian principles He was also immersed from the beginning in esoteric and occult ideas about the nature of the mind Deleuze and the Unconscious shows how these tendencies combine in Deleuze's work to engender a wholly new approach to the unconscious for which active relations to the unconscious are just as important as the better known pathologies of neurosis and psychosis **Japan in**
