Around The World In 1500 Around The World In 1:

A Short History of Christianity beyond the West Klaus Koschorke, 2024-11-04 Today the majority of the world's Christian population lives in the Global South. Knowledge of their history is therefore indispensable. This textbook offers a compact and vivid overview of the history of Christianity in Asia, Africa, and Latin America since 1450, focussing on diversity and interdependence, local actors, and global effects. Maps, illustrations, and numerous photos, as well as continuous references to easily accessible source texts, support the reader's own reading and its use in various forms of academic teaching. Special bonus material, including 250 photos taken by the author, can be accessed here: <https://doi.org/10.6084/m9.figshare.27623484.v2>

World Game Series: Document 1 R. Buckminster Fuller, The documents in this series originated with a proposal made by R. Buckminster Fuller to the International Union of Architects (IUA) at their VIIth Congress in London, England, in July 1961, launching the World Design Science Decade. He proposed then that the architectural schools around the world be encouraged by the IUA to invest the next ten years in a continuing problem of how to make the total world's resources, which in 1961 serve only 40%, serve 100% of humanity through competent design, despite a continuing decrease of metal resources per capita. In essence, The World Design Science Decade series of documents suggests, in great detail, ways in which world architectural schools and specifically their students should initiate and assume The Design Science Decade. The total series includes many of Fuller's most prescient ideas. A note from the series editor John McHale: Though the language of some of the texts may seem difficult at first approach, it should be borne in mind that one of our major problems in thinking today, 1965, is the use of language systems which still represent a fixed, structurally compartmentalized world view. The terms available to us for the expression of dynamic rather than static concepts are far from satisfactory. Fuller's language is particularly representative of the transitional state of the western world between the older traditional noun-centered culture to its present-day changing verb-centered culture. In his search for an adequately descriptive terminology, he tends to employ concepts and usages from many different fields juxtaposed in ways which may be unfamiliar to those more customarily restrained within the vocabularies of particular disciplines. Description by the Buckminster Fuller Institute, courtesy of The Estate of R. Buckminster Fuller.

Gold Coins of the World, 10th edition Arthur & Ira Friedberg, 2023-12-20 The tenth edition of *Gold Coins of the World* expands on its predecessor, digging more deeply into new areas of collector interest and expanding many sections. From the coins of Ancient Greece, Rome, and the Byzantine Empire, and from Afghanistan through Zanzibar, it includes the addition of many new discoveries for dozens of countries. From the 384 pages of the 1958 edition, the work has expanded to 852 pages, which have been completely revised and updated. The authors have listed more than 22,000 coin types, which are illustrated with more than 8,500 photos, now for the first time each one of them in color. Each country's section includes tables of weight and fineness. The market valuations are extensively revised to reflect both the higher price of gold as well as the skyrocketing demand for numismatic rarities. Valuations are now provided for the first time in up to

three states of preservation Many of the prices especially for great rarities and coins in higher grades have at least doubled In fact as collectors recognize the scarcity of coins in the highest states of preservation the premium for such coins relative to lower graded ones is escalating beyond traditional proportions The coinage of India and the Islamic world long dismissed by western collectors as difficult to decipher unimportant and lacking in value is now the subject of intense interest and has shown some of the most dramatic increases of all The reader will also find a useful directory of the world s leading gold coin dealers and auction houses For the numismatist banker economist historian or institution of higher learning the tenth edition of Gold Coins of the World is a book for every library public and private

Remote Sensing of Volcanic Processes and Risk Francesca Cigna,Deodato Tapete,Zhong Lu,Susanna K. Ebmeier,2021-03-17 Remote sensing data and methods are increasingly being implemented in assessments of volcanic processes and risk This happens thanks to their capability to provide a spectrum of observation and measurement opportunities to accurately sense the dynamics magnitude frequency and impacts of volcanic activity This book includes research papers on the use of satellite aerial and ground based remote sensing to detect thermal features and anomalies investigate lava and pyroclastic flows predict the flow path of lahars measure gas emissions and plumes and estimate ground deformation The multi disciplinary character of the approaches employed for volcano monitoring and the combination of a variety of sensor types platforms and methods that come out from the papers testify to the current scientific and technology trends toward multi data and multi sensor monitoring solutions The added value of the papers lies in the demonstration of how remote sensing can improve our knowledge of volcanoes that pose a threat to local communities back analysis and critical revision of recent volcanic eruptions and unrest periods and improvement of modeling and prediction methods Therefore the selected case studies also demonstrate the societal impact that this scientific discipline can potentially have on volcanic hazard and risk management
