## Arqueología Argentina:

Arqueología e historia en la colonia española de Floridablanca, Patagonia, siglo XVIII María Ximena Senatore, 2007-01-01 El libro *Arqueología e Historia en la Colonia Española de Floridablanca* expone ilusiones y utopías subyacentes al proyecto de poblamiento español de la Costa Patagónica de fines del siglo XVIII. En sus páginas se presentan nuevas miradas a la colonia de efímera existencia 1780-1784 y se invita a redescubrir sus restos materiales localizados en las cercanías de Puerto San Julián, Provincia de Santa Cruz, Argentina. Fue escrito con el propósito de dar a conocer los primeros pasos en el estudio del sitio arqueológico y ofrecer una perspectiva particular en el análisis de documentos históricos inéditos. La autora discute los mecanismos mediante los cuales una realidad social específica fue construida explorando la relación entre la creación de determinadas condiciones materiales y la estructuración de las relaciones sociales. Sus ideas articulan las narrativas y las materialidades que hoy conforman Floridablanca. Concluye su libro proponiendo a Floridablanca como escenario en el que se ensaya un modelo novedoso de sociedad inspirado en los discursos ilustrados. Asigna a Floridablanca en el mapa de los múltiples itinerarios de la modernidad. María Ximena Senatore, Doctora en Historia, U de Valladolid, España y Arqueóloga, U de Buenos Aires, es Investigadora de CONICET, Profesora de la Universidad de Buenos Aires y de la Universidad Nacional de la Patagonia Austral. Especializada en Arqueología Histórica y del Colonialismo, ha estudiado el rol del mundo material en la conformación de la modernidad en contextos particulares y distantes como el sur de Patagonia y Antártida. Ha publicado los libros *Arqueología da Sociedade Moderna na América do Sul* (2002) y *Un Pasado en Blanco: Arqueología Histórica en Antártida* (2007). **El arte rupestre de Argentina indígena** María Andrea Recalde, Rodolfo A. Raffino, Eduardo E. Berberian, 2005

**Debates actuales en arqueología y etnohistoria** Ernesto Olmedo, 2007 *Archaeology in Latin America* Benjamin Alberti, Gustavo G. Politis, 2005-08-16 The first overview of current themes in Latin American archaeology written solely by archaeologists native to the region making their collected expertise available to an English speaking audience for the first time. **International Handbook of Historical Archaeology** Teresita Majewski, David Gaimster, 2009-06-07 In studying the past, archaeologists have focused on the material remains of our ancestors. Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior. Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts, images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies, communities and individuals operated and behaved. Increasingly, historical archaeology refers not to a particular period, place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context. In short, historical archaeology provides direct evidence for how humans have shaped the world we live in today. Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context. Where historical

archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

**Handbook of South American Archaeology** Helaine Silverman, William Isbell, 2008-04-04 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized If so this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume Not only does the Handbook of South American Archaeology HSAA provide immense and broad information about ancient South America the volume also showcases the contributions made by South Americans to social theory Moreover one of the merits of this volume is that about half the authors 30 are South Americans and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research It is inevitable that the HSAA will be compared with the multi volume Handbook of South American Indians HSAI with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird Gordon Willey John Rowe and John Murra Steward states frankly in his introduction to Volume Two that arch ology is included by way of background to the ethnographic chapters

Benson, 1979 **De Tomebamba a Cuenca** Ross William Jamieson, 2003 Trekking the Shore Nuno F. Bicho, Jonathan A. Haws, Loren G. Davis, 2011-05-19 Human settlement has often centered around coastal areas and waterways Until recently however archaeologists believed that marine economies did not develop until the end of the Pleistocene when the archaeological record begins to have evidence of marine life as part of the human diet This has long been interpreted as a postglacial adaptation due to the rise in sea level and subsequent decrease in terrestrial resources Coastal resources particularly mollusks were viewed as fallback resources which people resorted to only when terrestrial resources were scarce included only as part of a more complex diet Recent research has significantly altered this understanding known as the Broad Spectrum Revolution BSR model The contributions to this volume revise the BSR model with evidence that coastal resources were an important part of human economies and subsistence much earlier than previously thought and even the main focus of diets for some Pleistocene and early Holocene hunter gatherer societies With evidence from North and South America Europe Africa Asia and Australia this volume comprehensively lends a new understanding to coastal settlement from the Middle Paleolithic to the Middle Holocene
