everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

La construcción de la arquitectura moderna en México Celia Esther Arredondo Zambrano, 2025-02-13 Este libro presenta la construcción de la arquitectura moderna mexicana mediante un enfoque basado en cinco estructuras de poder la académica la económica y política la de estatus social la de género y la poscolonial Se incluyen también fragmentos de entrevistas y análisis de obras de trece destacados arquitectos Luis Barragán José Villagrán García Juan O'Gorman Pedro Ramírez Vázquez Agustín Hernández Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan José Díaz Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno y Clara de Buen Todo ello proporciona un testimonio vivo de todo ese proceso Si bien las cinco estructuras de poder enmarcaron y definieron esa arquitectura las entrevistas de unos arquitectos que fueron sus protagonistas ayudan a descubrir e identificar sutilezas y matices en lo acontecido en ese periodo De este modo sus voces arrojan luz sobre lo que contribuyó a hacer de la arquitectura moderna mexicana algo tan singular a escala mundial Aunque esos arquitectos no siempre fueron conscientes de la presencia de esas estructuras de poder sus proyectos participaron en la marginación la discriminación y el sometimiento que tales estructuras provocaban En este sentido el presente estudio también revela hasta qué punto dichas estructuras de poder están todavía presentes en la arquitectura mexicana actual La singularidad de este libro se centra en describir los extraordinarios edificios modernos que surgieron en México en el contexto de esas cinco estructuras de poder A su vez el examen detallado de tales estructuras cuestiona su validez El estudio expresa asimismo la urgente necesidad actual de generar una nueva arquitectura que se sitúe fuera de los límites impuestos por los condicionantes del siglo XX Por todo ello este libro es una lectura esencial para quienes estudian la arquitectura mexicana y latinoamericana
