Arrivals And Rivals A Birding Oddity:

Arrivals and Rivals - a Birding Oddity Adrian M. Riley,2004 Adrian Rileys attempt to win the 2002 year listing competition and as a result depose his birding rival Lee Evans from his position at the top of the year listing tree is the central theme of this book Having said that the author was determined to remain friends with Lee and the developments in their relationship as the year progressed form a fascinating backdrop against which the birding was played out His book is much more than just a birding diary and is also an intriguing comment on the psychology of obsessive listing Furthermore running through the book are evocative descriptions of the many rare birds seen beautiful images of the wild places visited and humorous accounts of twitching that all birders will recognize and enjoy The book will therefore appeal to all birders and lovers of the countryside as well as to those who want to know what makes obsessive birders tick Arrivals and Rivals Adrian M. Riley,2007 Describes the struggle to become nationally recognised Birder of the Year a competition involving much travelling and sometimes a little guile too This book contains accounts of several bird species encountered as well as descriptions of the habitats visited *Invasive and Introduced Plants and Animals* Ian D. Rotherham,Robert A. Lambert,2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate **Birdwatchingwatching** Alex Horne,2009 This is birdwatchingwatching a hilarious true story about fathers and sons the birds not the bees and the eccentricities of two very different species **The British**
