Art and Visual Perception, Second Edition Rudolf Arnheim, 2004-11-08 Gestalt theory and the psychology of visual perception form the basis for an analysis of art and its basic elements *Parables of Sun Light* Rudolf Arnheim, 1989 For many years Rudolf Arnheim known as the leading psychologist of art has been keeping notebooks in which to jot down observations ideas questions and even after a stay in Japan for a year poems in the haiku pattern Some of these notes found their way into his books known and prized the world over such as *Art and Visual Perception* *Visual Thinking* and *The Power of the Center* see list below Now he has selected from the remaining riches of his notebooks the items in this volume The book will be a joy to ramble through for all lovers of Arnheim's work and indeed for anyone who shares Arnheim's contagious interest in the order that lies behind art nature and human life It is a seedbed of ideas and observations in his special fields of psychology and the arts I have avoided mere images and I have avoided mere thoughts says Arnheim in the Introduction but whenever an episode observed or a striking sentence read yielded a piece of insight I had not met before I wrote it down and preserved it There are also glimpses of his personal life his wife his cats his students his neighbors and colleagues He is always concrete in the manner that has become his trademark often witty and sometimes a bit wicked In the blend of life and

thought caught in these jottings psychology and the arts are of course prominent But philosophy religion and the natural sciences add to the medley of topics always addressed in a way to sharpen the senses of the reader who sharing Arnheim's cue from Dylan Thomas may accompany him through the parables of sun light and the legends of the green chapels and the twice told fields of childhood All of Rudolf Arnheim's books have been published by the University of California Press

The McGurk Universe K.J. Donnelly, 2023-01-01 This book reconsiders audiovisual culture through a focus on human perception with recourse to ideas derived from recent neuroscience It proceeds from the assumption that rather than simply working on a straightforward cognitive level audiovisual culture also functions more fundamentally on a physiological level directly exploiting precise aspects of human perception Vision and hearing are unified in a merged signal in the brain through being processed in the same areas This is illustrated by the startling McGurk Effect whereby the perception of spoken sound is

changed by its accompanying image and counterpart effects which demonstrate that what we see is affected by different sounds accompanying sounds This blending of sound and images into a whole has become a universal aspect of culture not only evident in films and television but also in video games and short Internet clips Indeed this aesthetic formation has become the dominant of this period The McGurk Universe attends to how audiovisual culture engages with and mediates between physiological and psychological levels
