studies Wallace Stevens and pre Socratic philosophy showing how concepts that animate Stevens poetry parallel concepts and techniques found in the poetic works of Parmenides Empedocles and Xenophanes and in the fragments of Heraclitus Tompsett traces the transition of pre Socratic ideas into poetry and philosophy of the post Kantian period assessing the impact that the mythologies associated with pre Socratism have had on structures of metaphysical thought that are still found in poetry and philosophy today This transition is treated as becoming increasingly important as poetic and philosophic forms have progressively taken on the existential burden of our post theological age Tompsett argues that Stevens poetry

attempts to play its audience into an ontological ground in an effort to show that his reduction of metaphysics is not dry philosophical imposition but is enacted by our encounter with the poems themselves Through an analysis of the language and form of Stevens poems Tompsett uncovers the mythology his poetry shares with certain pre Socratics and with Greek tragedy This shows how such mythic rhythms are apparent within the work of Friedrich Nietzsche Martin Heidegger and Hans Georg Gadamer and how these rhythms release a poetic understanding of the violence of a reduction of metaphysics A
