Glynn, 1990-09-06 El Ni o is a meteorologic oceanographic phenomenon that occurs sporadically every few years at low latitudes It is felt particularly strongly in the eastern Pacific region notably from the equator southwards along the coasts of Ecuador and Peru The El Ni o is a component of the ENSO El Ni o Southern Oscillation which accentuates the intimate and causal connection between atmospheric and marine processes Obvious manifestations of El Ni o in the eastern Pacific are anomalous warming of the sea reduced upwelling a marked decline in fisheries and high rainfall with frequent flooding The 1982 83 El Ni o was exceptionally severe and was probably the strongest warming of the equatorial Pacific Ocean to occur during this century The warming was intense and spread over large parts of the Pacific Ocean and penetrated to greater depths than usual Many eastern Pacific coral reefs that had exhibited uninterrupted growth for several hundred years until 1983 were devastated by the disturbance and are now in an erosional mode Marine species were adversely affected The consequent depletion of the plant food base resulted in significant reductions in stocks of fish squid etc This led to a mass migration and near total reproductive failure of marine birds at Christmas Island Emphasis in this volume is placed on disturbances to benthic communities littoral populations terrestrial communities and extratropical regions **Commerce Business Daily** , 1997-12-31 **Comprehensive Organic Synthesis** , 2014-02-14 The second edition of Comprehensive Organic Synthesis winner of the 2015 PROSE Award for Multivolume Reference Science from the Association of American Publishers builds upon the highly respected first edition in drawing together the new common themes that underlie the many

The Privatisation of British Rail Sean McCartney, John Stittle, 2023-05-23 The privatisation of the British railway industry was a unique political and economic event An integrated industry was broken up into numerous component parts and sold off to private sector interests The result was a highly fragmented industry that was structurally unsound and operationally dysfunctional This authoritative volume presents an enlightening portrait of an industry that is less efficient more costly and still more dependent on state subsidy today than its nationalised predecessor The nine chapters in this work present a comprehensive and rigorous evaluation of how and why the industry has become so dysfunctional and costly supported by detailed financial analysis and industry examples Seven chapters comprise a series of peer reviewed academic papers by Professor McCartney and Dr Stittle and published in leading international journals over the period 2004 2017 which analyse selected key segments of the privatised industry where appropriate updates are provided at the end of these chapters outlining developments since initial publication relevant to the analysis therein Two chapters are published here for the first time Chapter 7 reviews the performance of the freight sector while Chapter 1 bookends the volume by providing first an account of how rail privatisation was conceived and implemented in the 1980s 90s and then reviews the impact of the pandemic and the proposals of the Williams Shapps White Paper of 2021 which if enacted will effectively end the Major government's experiment Going far beyond the usual superficial analysis of the topic this volume will be of significant
