**Environmental History** John Wills, 2012-11-28 Environmental issues in the USA are more important now than ever before The devastation inflicted by Hurricane Katrina growing evidence of global warming and a struggling national energy supply highlight the unfolding crisis Environmental fears translate into US automobile giants plying consumers with fuel efficient

cars in the MPG Lounge of sales Politicians talk of energy independence and getting tough on polluters Fears gravitate around a fast approaching doomsday scenario an environmental endgame of wholesale collapse unless something is done Yet fears of doomsday are nothing new John Wills shows how the current environmental crisis is firmly rooted in the past As well as explaining how today s problems are manifestations of older systems of economics culture and politics he also argues that America has already witnessed a range of doomsday scenarios both real and imagined He identifies and explores a cast of doomsday landscapes that includes the Battle of the Wilderness in Virginia the Santa Barbara Oil Spill the Fable for Tomorrow town featured in Rachel Carson s Silent Spring 1962 and Nevada s Doom Towns 1 and 2 blown apart by atomic testing in the 1950s He reflects on contemporary ruminations over whether nature as a category endures given both the rising contamination of the US landscape and consumer proclivity for celebrating fake mementos of the outdoors such as plastic lawn flamingos and artificial plants And most significantly he poses the question of whether Americans have been inviting doomsday through their long term environmental actions

Giglio,2010 Now in its third edition Here s Looking at You Hollywood Film and Politics examines the tangled relationship between politics and Hollywood which manifests itself in celebrity involvement in political campaigns and elections and in the overt and covert political messages conveyed by Hollywood films The book s findings contradict the film industry s assertion that it is simply in the entertainment business and examines how while the majority of Hollywood films are strictly commercial ventures hundreds of movies ranging from Birth of a Nation to Capitalism do indeed contain political messages This new edition has been updated with new photos and cartoons and includes two new chapters one on Afghan Iraqi war films and the other on the treatment of race and gender in Hollywood films that are sure to stimulate discussion Here s Looking at You serves as a basic text for political film courses and as a supplement in American government and film studies courses and will also appeal to film buffs and people in the film industry

**Humans in Outer Space - Interdisciplinary Odysseys** Luca Codignola-Bo,Kai-Uwe Schrogl,2009-06-18 Humans and space When faced with the issue of space exploration one generally has an idea of the elds of study and disciplines that are involved technology physics and chemistry robotics astronomy and planetary science space biology and medicine disciplines which are usually referred to as the sciences In recent discussions the human element of space exploration has attracted more and more the interest of the space sciences As a consequence adjacent disciplines have gained in relevance in space exploration and space research in times when human space ights are almost part of everyday life These disciplines include psychology and sociology but also history philosophy anthropology cultural studies political sciences and law The cont bution of knowledge in these elds plays an important role in achieving the next generation of space exploration where humans will resume exploring the Moon and eventually Mars and wherespacetourism isbeginningtobedeveloped With regard to technology one might soon be prepared for this Much less is this the case with

space exploration by humans rather than by robots Robotic explorations to other planets across the solar system have developed in the past 50 years since the beginning of the space age with the presence of humans in nearby space and the landing on the Moon Space exploration is now not only focused on technological achievements as its developmental social cultural and economic impacts This makes human space exploration a topic to address in a cross disciplinary manner
