Narratives of Addiction Kevin McCarron,2022-01-03 Narratives of Addiction Savage Usury is the first book to argue in the face of more than a century's received wisdom that drug addiction and alcoholism are undoubtedly evidence of individual moral flaws However the sense of morality that underlies this book is completely severed from Christianity Instead it is influenced in particular by the writings of the nineteenth century German philosophers Arthur Schopenhauer and Frederick Nietzsche both of whom insisted that a genuine morality was actually incompatible with Christianity The sequence of chapters moves from addictions on the streets into rehab clinics and finally into the meetings of Alcoholics Anonymous and Narcotics Anonymous This is the first book to argue that the search for pleasure drives alcoholism and drug addiction and not the numbing of pain Throughout the book I reject the claims of the medical profession as embodied by the American Medical Association that drug addiction and alcoholism are diseases and further argue that they do not have the authority to tell hundreds of millions of Americans that addiction is not a moral failing I also query throughout the book the claims of neuroscience psychology and the social sciences that addictions to alcohol and drugs are attributable to causes that their specific disciplines are best suited to understand I argue that there is nothing complex about addiction it is a simple behavioural disorder The language routinely employed to discuss addiction is similarly not complex just confused and so it is also the rhetoric of addiction discourse especially its use of simile metaphor and euphemism that this book evaluates

Christ and Freud (RLE: Freud) Arthur Guirdham, 2013-10-08 Originally published in 1959 this book is primarily concerned with the question of psychiatric factors in religion and conversely with that of religious factors in psychiatry It rejects the Freudian theory that religion is a form of obsessional neurosis Though this latter hypothesis may explain many of the phenomena of religious observance it cannot explain the reality of religious experience Dr Guirdham believes that orthodox Christianity is a perversion of the psychologically irrefutable teaching of Christ and that its conception of God as a supreme being endowed with supreme power its teaching on the resurrection and its contamination with a sense of guilt are especially conducive to psychiatric disorder He shows how theology may actually be inimical to religious experience and how faith differs from belief and is a response of the whole man The book explains also the psychological origins of clericalism and demonstrates the role played by the latter in stifling religious experience
