Aromatic Compounds:

Synthesis of Aromatic Compounds Kenneth E. Maly, 2022-07-05 Aromatic compounds are a diverse and fascinating class of compounds with wide ranging importance This book provides an overview of the synthesis and reactivity of aromatic compounds The publication covers the many important reaction types such as electrophilic and nucleophilic substitution the reactivity of benzyne aryllithium chemistry and transition metal mediated reactions It also includes a discussion of the synthesis of heteroaromatic compounds polycyclic aromatic compounds and nonplanar aromatic systems This book focusses on reaction mechanisms and numerous examples of applications in multistep synthesis of aromatic compounds

Photophysical and Photochemical Properties of Aromatic Compounds Jacob Malkin, 1992-06-10 Photophysical and Photochemical Properties of Aromatic Compounds is the first book to collect and classify all available quantitative data on the photochemistry and luminescence of aromatic compounds Compounds are classified by both spectral luminescent ϵ g extinction coefficients energies and lifetimes of lower excited states and photochemical properties In addition all of the quantum yields available have been collected The variety of photochemical reactions of aromatics is examined based on eight types of elementary monomolecular and bimolecular photochemical processes Aromatic compounds are grouped into eight categories and the book analyzes the possibilities of occurrence of all types of elementary photoprocesses
