**The Working Man's Reward** Elaine Lewinnek, 2014 Between the 1860s and 1920s Chicago's working class immigrants designed the American dream of home ownership They imagined homes as small businesses homes that were simultaneously a consumer-oriented respite from work and a productive space that workers hoped to control Leapfrogging out of town along with Chicago's assembly line factories Chicago's early suburbs were remarkably diverse These suburbs were marketed with the elusive promise that homeownership might offer some bulwark against the vicissitudes of industrial capitalism that homes might be better than a bank for a poor man in the words of one evocative advertisement and the working man's reward This promise evolved into what Lewinnek terms the mortgages of whiteness the hope that property values might increase if that property could be kept white Suburbs also developed through nineteenth century notions of the gendered respectability of domesticity early ideas about city planning and land economics as well as an evolving twentieth century discourse about the racial attributes of property values Because Chicago presented itself as a paradigmatic American city and because numerous Chicago-based experts eventually instituted national real estate programs Chicago's early growth affected the growth of twentieth century America Framed by two working class riots against suburbanization in 1872 and 1919 spurred from both above and below this work shows how Chicagoans helped form America's urban sprawl and examines the roots of America's suburbanization synthesizing the new suburban history into the diversity of America's suburbs
