Arsenic In The Environment:

Managing Arsenic in the Environment Ravi Naidu, Euan Smith, Gary Owens, Prosun Bhattacharya, 2006-02-07 Arsenic is one of the most toxic and carcinogenic elements in the environment. This book brings together the current knowledge on arsenic contamination worldwide, reviewing the field, highlighting common themes and pointing to key areas needing future research. Contributions discuss methods for accurate identification and quantification of individual arsenic species in a range of environmental and biological matrices and give an overview of the environmental chemistry of arsenic. Next chapters deal with the dynamics of arsenic in groundwater and aspects of arsenic in soils and plants, including plant uptake studies, effects on crop quality and yield, and the corresponding food chain and human health issues associated with these exposure pathways. These concerns are coupled with the challenge to develop efficient, cost-effective risk management and remediation strategies. Recent technological advances are described and assessed, including the use of adsorbents, photo-oxidation, bioremediation, and electrokinetic remediation. The book concludes with eleven detailed regional perspectives of the extent and severity of arsenic contamination from around the world. It will be invaluable for arsenic researchers as well as environmental scientists and environmental chemists, toxicologists, medical scientists, and statutory authorities seeking an in-depth view of the issues surrounding this toxin.

Arsenic in the Environment: Bridging Science to Practice for Sustainable Development As2021 Albert van der Wal, Arslan Ahmad, Branislav Petrushevski, Jan Weijma, Dragan Savic, Patrick van der Wens, Erwin Beerendonk, Prosun Bhattacharya, Jochen Bundschuh, Ravi Naidu, 2024-01-19 The Congress and Exhibition Series Arsenic in the Environment offers an international multi and interdisciplinary discussion platform for research and innovation aimed towards a holistic solution to the challenges posed by the environmental toxin arsenic with global societal impact. The Congress has focused on cutting edge and breakthrough research in physical, chemical, toxicological, medical, agricultural, and other specific issues on arsenic across a broader environmental realm. The Biennial Congress and Exhibition Arsenic in the Environment was first organized in Mexico City As2006, followed by As2008 in Valencia, Spain; As2010 in Tainan, Chinese Taiwan; As2012 in Cairns, Australia; As2014 in Buenos Aires, Argentina; As2016 in Stockholm, Sweden; and As2018 in Beijing, P R China. The 8th International Congress As2020 was held June 7-9, 2021, first time digitally, owing to the global COVID-19 pandemic, in Wageningen, The Netherlands, and with a title Arsenic in the Environment: Bridging Science to Practice for Sustainable Development. The Congress addressed the broader context of arsenic research aligned on the following themes: Theme 1: Arsenic in Natural Soil and Water Systems; Theme 2: Arsenic in Agriculture and Food Production; Theme 3: Health Impacts of Arsenic; Theme 4: Technologies for Arsenic Removal from Water; Theme 5: Sustainable Mitigation and Management for Sustainable Development. Arsenic in drinking water and food is a major health issue affecting millions of people in many parts of the world. In recent years, serious cases of arsenic exposure through different environmental matrices have been reported from, for example, Argentina, Bangladesh, Chile, China, Taiwan, Turkey.

India Mexico UK USA Pakistan Vietnam as well as other regions in the world Arsenic can cause a number of carcinogenic and non carcinogenic adverse effects on human health and therefore human exposure to arsenic should be avoided Notably The Netherlands has been in the forefront of research on arsenic removal technology and developed a cutting edge innovation to remove arsenic to levels below the WHO drinking water guideline to as low as less than 1 g L This has created an enabling environment to discuss on policy issues for defining the new drinking water guideline The Congress has attracted professionals involved in different segments of interdisciplinary research on arsenic in an open forum and strengthened relations between academia research institutions government and non governmental agencies industries and civil society organizations to share an optimal ambience for exchange of knowledge *Arsenic in the Environment* S. M. Imamul Huq, 2023-11 Arsenic is ubiquitous in nature and has toxic effects on humans animals and plants This book discusses arsenic toxicity and ways of mitigating it It includes seven chapters that discuss arsenic sources contamination consequences and remediation possibilities The chapters address arsenic and risks to human health plant health and function and fish and aquatic biota as well as the chemistry of gas emission control and possibilities for remediating arsenic contamination in water soil and air **Environmental Chemistry of Arsenic** William T. Frankenberger, Jr, 2001-12-04 With contributions from world renowned experts in the field this book explores developments in the transport kinetics seasonal cycling accumulation geochemistry transformation and toxicology of arsenic It details advances in the prevention and control of arsenic and arsenic compounds in the air soil and water and offers analytical methods for the detection and study of arsenic in the environment and human body Providing bioremediation techniques for effective treatment of contaminated water supplies the book discusses factors that influence the removal of arsenic from water as well as diurnal and seasonal variations in the arsenic concentration of surface water supplies Environmental Arsenic in a Changing World Yongguan Zhu, Huaming Guo, Prosun Bhattacharya, Arslan Ahmad, Jochen Bundschuh, Ravi Naidu, 2019-08-23 The Congress Arsenic in the Environment offers an international multi and interdisciplinary discussion platform for research and innovation aimed towards a holistic solution to the problem posed by the environmental toxin arsenic with significant societal impact The Congress has focused on cutting edge and breakthrough research in physical chemical toxicological medical agricultural and other specific issues on arsenic across a broader environmental realm The Biennial Congress Arsenic in the Environment was first organized in Mexico City As2006 followed by As2008 in Valencia Spain As2010 in Tainan Chinese Taiwan As2012 in Cairns Australia As2014 in Buenos Aires Argentina and As2016 in Stockholm Sweden The 7th International Congress As2018 was held July 1 6 2018 in Beijing P R China and was entitled Environmental Arsenic in a Changing World The Congress addressed the broader context of arsenic research aligned on the following themes Theme 1 Arsenic Behaviour in Changing Environmental Media Theme 2 Arsenic in a Changing Agricultural Ecosystem Theme 3 Health Impacts of Environmental Arsenic Theme 4 Technologies for Arsenic Immobilization and Clean Water Blueprints Theme 5 Sustainable Mitigation and

Management Arsenic in drinking water mainly groundwater has emerged as an issue of global health concern During last decade the presence of arsenic in rice possibly also other food of plant origins has attained increasing attention This is particularly true in the Asian countries where the use of high arsenic groundwater as source of irrigation water and drinking water has been flagged as severe health concern This has been accentuated by elevating arsenic concentrations in deep groundwater recharged from shallow high arsenic groundwater which may have further detrimental effects on public health Notably China has been in the forefront of research on arsenic biogeochemical cycling health effects of arsenic technologies for arsenic removal and sustainable mitigation measures The Congress has attracted professionals involved in different segments of interdisciplinary research on arsenic in an open forum and strengthened relations between academia research institutions government and non governmental agencies industries and civil society organizations to share an optimal ambience for exchange of knowledge
