The scholarly essays in this book focus on the theme of art and social change in Western art from the Renaissance to about 1950. The edited volume includes contributions by scholars with a range of professional backgrounds and affiliations. Their essays address some aspect of the theme and engage with one or more artworks in the collection of La Salle University Art Museum. Topics include religious iconography, portraiture, landscape, journal illustrations, and Modernist abstraction. These essays on the collection add to the body of scholarship which situates works of art in contexts that help reveal and explain changes in social, political, or cultural values. The book is lavishly illustrated with 104 color illustrations.

Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1989 **The Politics of Architectural Pedagogy in Iran** Ali Javid, 2024-08-26

The Politics of Architectural Pedagogy in Iran explores the evolution of architectural pedagogy during two significant socio-political upheavals in Iran: The White Revolution (1963) and the Islamic Revolution (1979). It examines how these transformative periods influenced the field, providing valuable insights into the intersection of architectural education and broader socio-political shifts in Iran. By examining the critical role of education in achieving geopolitical objectives during the Cold War, this book explores architectural pedagogy as an agent for resistance and revolution. It highlights how architectural pedagogy not only reflects radical ideologies but also actively engages in socio-political transformation. The book uncovers how architectural pedagogy became one of the mechanisms to accomplish revolutionary goals. This is evident in initiatives like the Pedagogical Revolution during the White Revolution (1963) aimed at modernizing educational institutions, and the Revolutionary Pedagogy during the Islamic Revolution (1979) which sought to serve the masses and the religious revolutionary society. In this way, the book adds a new geopolitical perspective to the contemporary discourse of radical pedagogies. This book explores the intricate connections between architectural pedagogy and politics through a transdisciplinary approach. It analyzes original multilingual documents including political agendas, cultural agreements, curricula, teaching methods, student works, exhibitions, and conferences. It will be of interest to architectural historians and architecture students, particularly those interested in Global South development, modernism, architectural pedagogy, international relations, and Middle Eastern studies.
