Nucho, 2003-01-01 This expanded second edition is an important reference volume on the theoretical foundations of art therapy The text presents a detailed account of the origins and rationale of art therapy The author underscores the need for a new model of intervention describes the advantages of visual forms of cognition discusses general system theory and the field of cybernetics delineates several existing models of art therapy and outlines the essential features of the psychocybernetic model a model combining the verbal analytic and the visual imagistic symbol systems The text then focuses on implementation of the model and the four steps of the therapeutic process unfreezing doing dialogue and ending and integrating A number of specific techniques to promote visual cognition are suggested and practical matters including the qualifications necessary for the practice of this intervention model as well as the time space and art materials required are presented Readers will find the discussion of the psychocybernetic process immensely helpful particularly if they wish to combine the traditional largely verbal means of interpersonal helping with techniques of art therapy In addition the author presents analyses of case studies as well as a collection of client artworks to illustrate the appropriate use of the model This new edition will prove useful not only when working with children and adolescents but also with various kinds of adults ranging from minimally dysfunctional to severely dysfunctional and also with those who are in the final phases of life This book will serve as an excellent reference for libraries and teachers of expressive therapies as well as for use by practitioners of various forms of psychotherapy *Models* Marx W. Wartofsky, 2012-12-06 Marx Wartofsky has been working for many years within an unusual confluence of philosophical problems He brings to these intersecting problems his comprehensive intelligence at once imaginative and rigorous analytic and historical He is a philosopher s philosopher but also Everyman s Wartofsky is philosopher of the natural and the social sciences of perception esthetics and the creative arts of the 18th century French and the 19th century Germans of politics and morality of the methods and morals of medicine and it is plain of all human existence To a colleague he seems Jack of all philosophical trades and master of them too The reader soon will learn that Wartofsky is a genial lucid and relaxed philosophical companion deeply serious but without noticeable anxiety I need not highlight these selected epistemological papers gathered as and about *Models* since Wartofsky s own introductory remarks are helpful and stimulating in that respect I need only after 21 years of friendship and collaboration with him warn the reader to beware of how profound and provocative these papers will show themselves to be beneath their good humored and swiftly flowing surface And I must publicly note the pleasure with which I welcome Marx Wartofsky s volume to our Boston Studies Boston University R S C Center for the Philosophy and History of Science September 1979 vii TABLE OF CONTENTS EDITORIAL PREFACE VII xi AC
