Art Archaeology In China:

Art and Archaeology in China Edmund Capon, 1977 **Ancient China** Jessica Rawson, 1980 **The Art and Archaeology in China** Edmund Capon, 1977-01 Art and Archaeology in China documents one of the most acclaimed and well attended exhibitions in recent years. Over three million visitors saw the flying horse of the Han dynasty and the jade shroud that are now widely and popularly recognized and pictured here along with many other archaeological treasures. Illustrations depict objects that range in time from 600 000 BC to the end of the Yuan dynasty in the fourteenth century. Many are shown in their archaeological settings. The text by Edmund Capon places them in historical perspective and cultural context and explains modern China's unusual approach to archaeological preservation and interpretation. While there is much to fascinate archaeologists, historians, and sinologists, the book will appeal to readers and viewers without specialized knowledge but who have an eye for incomparable beauty.

The Arts of China Michael Sullivan, 1984-01-01 this book presents a fascinating and balanced picture of Chinese art from the Stone Age to the present day. The author concerns himself not only with art but also with Chinese philosophy, religion, and the realm of ideas.

China Archaeology and Art Digest, 2001 A comprehensive quarterly digest and index of all quality Chinese publications in the archaeological and art history fields includes also translated longer synopses of articles on topics covered and a report of archaeological news.

Recarving China's Past Cary Yee-Wei Liu, Michael Nylan, Anthony Jerome Barbieri-Low, Naomi Noble Richard, Michael Loewe, Susan L. Beningson, 2005 The Wu Family shrines, one of the most important cultural monuments of early China, comprise approximately 50 stone slabs from the so-called Wu cemetery in Shandong province. This illustrated book examines the stone slabs and their rubbings as artifacts with a complex cultural history from the second century to the present.

Exploring China's Past Roderick Whitfield, Tao Wang, 1999 Art, Archaeology & Science Meili Yang, 2016 Science has played a crucial role in the initial stages of westerners collecting and studying ancient Chinese artworks and archaeological materials. The relevant scientific data were quickly generated using progressively sophisticated examination techniques. But the task of integrating scientific data with archaeological and art historical resources and developing a workable interdisciplinary study method has lagged behind scientific endeavor. Part One of this book explores the modes and functions of the scientific resources available and their integration into interdisciplinary study methods and models. Pre-war researchers particularly emphasized that their studies of Chinese artistic archaeological materials were scientific. Improvements in precision and advanced specialization of examining instruments and techniques resulted in substantively more detailed scientific data, particularly in the post-war period. This brought with it new research dimensions and increased knowledge of targeted samples and also greater challenges to the integration of interdisciplinary study. In Part Two, Meili Yang establishes a feasible method of interdisciplinary study in terms of five case studies related to Chinese Song ceramics. Relevant data are provided.

and professionally explained resulting in critical new information related to contemporary ceramic technologies This technology information leads us to the recognition of the uniqueness of each single artwork and the artisan s individual intention and critically recognition of the close association with contemporary society and culture at the time of manufacture Utilizing this new method of interdisciplinary study modern science ancient technology and art and society are seen to have explicit connections The author not only broadens scholars and readers perspectives regarding ancient ceramic craft but provides a rigorous methodology applicable to interdisciplinary studies across other disciplines
