Essays in Trespassing Albert O. Hirschman, 1981-08-31 This book brings together fourteen articles and papers written by Albert O Hirschman About half deal with the interaction of economic development with politics and ideology the area in which Hirschman perhaps has made most noted contributions Among these papers are The Rise and Declines of Development Economics a magisterial and yet pointed essay in intellectual history and his famous article The Changing Tolerance for Income Inequality in the Course of Economic Development Hirschman's ability to trespass or rather his inability not to trespass from one social science to another and beyond is the unifying characteristic of the volume Authoritative searching surveys alternate here with essays presenting some of Hirschman's characteristic inventions for instance the tunnel effect and obituary improving activities Three of the papers have not been published previously and a number of introductory notes have been especially drafted for the present volume to evoke the intellectual political climate in which certain groups of essays were written

The Economic Development of Latin America Since Independence Luis Bértola, José Antonio Ocampo, 2012-10-25 A comprehensive and accessible overview of the economic history of Latin America over the two centuries since Independence It considers its principal problems and the main policy trends and covers external trade economic growth and inequality

Latin American Theories of Development and Underdevelopment Cristóbal Kay, 2010-11-26 Upon its publication in 1989 this was the first systematic and comprehensive analysis of the Latin American School of Development and an invaluable guide to the major Third World contribution to development theory The four major strands in the work of Latin American Theorists are structuralism internal colonialism marginality and dependency Exploring all four in detail and the interconnections between them Cristobal Kay highlights the developed world's over reliance on and partial knowledge of dependency theory in its approach to development issues and analyses the first major challenges to neo classical and modernisation theories from the Third World

The New Authoritarianism in Latin America David Collier, Fernando Henrique Cardoso, Joint Committee on Latin American Studies, 1979 While one of the most important attempts to explain the rise of authoritarian regimes and their relationship to problems of economic development has been the bureaucratic authoritarian model there has been growing dissatisfaction with various elements of this model In light of this dissatisfaction a group of leading economists political scientists and sociologists was brought together to assess the adequacy of the model and suggest directions for its reformulation This volume is the product of their discussions over a period of three years and represents an important advance in the critique and refinement of ideas about political development Part One provides an overview of the issues of social science analysis raised by the recent emergence of

authoritarianism in Latin America and contains chapters by David Collier and Fernando Henrique Cardoso The chapters in Part Two address the problem of explaining the rise of bureaucratic authoritarianism and are written by Albert Hirschman Jose Serra Robert Kaufman and Julio Coder In Part Three Guillermo O Donnell James Kurth and David Collier discuss the likely future patterns of change in bureaucratic authoritarianism opportunities for extending the analysis to Europe and priorities for future research The book includes a glossary and an extensive bibliography

The Political Economy of the World Bank Michele Alacevich, 2009 From the Publisher The Political Economy of the World Bank The Early Years is a fascinating study of economic history This text describes perhaps what is the most crucial time for development economics the birth of the third world the creation of development economics as a discipline and the establishment of the World Bank s

leading role in development Using previously unavailable archival material Michele Alacevich takes a close look at the years during which the International Bank for Reconstruction and Development now known as the World Bank turned its attention from reconstruction to development having been upstaged by the Marshall Plan He describes the Currie Mission to Colombia 1949 1954 the World Bank's first general survey mission in a developing nation With the Currie Mission as a starting point and a case study Alacevich analyzes the complexities of the Bank's first steps toward economic and social development in poorer nations and helps the reader understand some foundational questions about development that are still of great relevance today *The Political Economy of the World Bank The Early Years* is essential reading for anyone interested in the economic history of international development as a lens for better understanding current development issues *Routledge International Handbook of Failure* Adriana Mica, Mikołaj Pawlak, Anna Horolets, Paweł Kubicki, 2023-01-30 This Handbook examines the study of failure in social sciences its manifestations in the contemporary world and the modalities of dealing with it both in theory and in practice It draws together a comprehensive approach to failing and invisible forms of cancelling out and denial of future perspectives Underlining critical mechanisms for challenging and reimagining norms of success in contemporary society it allows readers to understand how contemporary regimes of failure are being formed and institutionalized in relation to policy and economic models such as neo liberalism While capturing the diversity of approaches in framing failure it assesses the confluences and shifts which have occurred in the study of failure over time Intended for scholars who research processes of inequality and invisibility this Handbook aims to formulate a critical manifesto and activism agenda for contemporary society Presenting an integrated view about failure the Handbook will be an essential reading for students in sociology social theory anthropology international relations and development research organization theory public policy management studies queer theory disability studies sports and performance research **The Paradox of Plenty** Terry Lynn Karl, 1997-10-10 In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft *The Paradox of Plenty* Terry Lynn Karl, 1997-10-10 The Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl's incisive investigation unites structural and choice based approaches by illuminating how decisions of

policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state s leading sector as the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself **An East Asian Model for Latin American Success** Anil Hira,2016-12-14 Latin America is at a uniquely important juncture in its history and the history of development more generally Neoliberal market orientated policies are being called into question growth has been volatile and equity has stayed the same or worsened In Latin America there is no clear direction for change This book presents an alternative development path for Latin America based on an East Asian model East Asia remains the only developing region so far with high stable and equitable economic development Based on in depth analysis and the presentation of new and unique material this study provides a new perspective on the lessons of China s rapid development and examines relations between states and companies that have led to greater success by East Asian companies entering new international markets More importantly it highlights how Latin American politics can and must be transformed Challenges of Modernization and Governance in South Korea Jae-Jung Suh,Mikyoung Kim,2017-07-31 Focusing on the sinking of the Sewol a commercial ferry which capsized off the South Korean coast in April 2014 this book considers key issues of disaster governance civil society and the ideational transformation of human agents and their empowerment Providing a lens through which to re examine South Korean institutions laws and practices the volume examines the impact of the Sewol incident and what it reveals about the fault lines of South Korean society and governance It addresses the repercussions of South Korea s turn to a liberal democracy and neoliberal economy and reflects on the multilayered implications of the disaster in respect to the potential human costs of the country s state driven development policy and high stress modernisation The book also highlights the relevance of the Korean experience for other societies on a similar developmental trajectories and facing similar challenges

Interdependent Development Harold Brookfield,2012-08-06 Rather than being a book about development per se this work first published in 1975 is instead a book about ideas about development designed for those drawn by a concern over social injustice into the development field In a selective review of theory which gives particular emphasis to the spatial dimension in Western Marxist and neo Marxist thought Harold Brookfield traces the evolution of ideas about world inequality and the problem of development from the days before the underdeveloped countries were considered to be a major problem through the years dominated by economic growth to the more searching approaches of the contemporary era The central argument of the book is that development is a totality which cannot properly be understood by separation into parts The developed and underdeveloped countries constitute one interdependent system and change in one cannot be understood without consideration of the other *Cement, Earthworms, and Cheese Factories* Jill DeTemple,2012-11-15 *Cement Earthworms and Cheese Factories* examines the ways in which religion and community development are closely intertwined in a rural part of contemporary Latin America Using historical documentary and ethnographic data collected over more than

a decade as an aid worker and as a researcher in central Ecuador Jill DeTemple examines the forces that have led to this entanglement of religion and development and the ways in which rural Ecuadorians as well as development and religious personnel negotiate these complicated relationships Technical innovations have been connected to religious change since the time of the Inca conquest and Ecuadorians have created defensive strategies for managing such connections Although most analyses of development either tend to ignore the genuinely religious roots of development or conflate development with religion itself these strategies are part of a larger negotiation of progress and its meaning in twenty first century Ecuador DeTemple focuses on three development agencies a liberationist Catholic women s group a municipal unit dedicated to agriculture and evangelical Protestant missionaries engaged in education and medical work to demonstrate that in some instances Ecuadorians encourage a hybridity of religion and development while in other cases they break up such hybridities into their component parts often to the consternation of those with whom religious and development discourse originate This management of hybrids reveals Ecuadorians as agents who produce and reform modernities in ways often unrecognized by development scholars aid workers or missionaries and also reveals that an appreciation of religious belief is essential to a full understanding of diverse aspects of daily life

Place-making and Urban Development Pier

Carlo Palermo, Davide Ponzini, 2014-12-05 The regeneration of critical urban areas through the redesign of public space with the intense involvement of local communities seems to be the central focus of place making according to some widespread practices in academic and professional circles Recently new expertise maintains that place making could be an innovative and potentially autonomous field competing with more traditional disciplines like urban planning urban design architecture and others This book affirms that the question of making better places for people should be understood in a broader sense as a symptom of the non contingent limitations of the urban and spatial disciplines It maintains that research should not be oriented only towards new technical or merely formal solutions but rather towards the profound rethinking of disciplinary paradigms In the fields of urban planning urban design and policy making the challenge of place making provides scholars

and practitioners a great opportunity for a much needed critical review Only the substantial reappraisal of long standing technical cultural institutional and social premises and perspectives can truly improve place making practices The pressing need for place making implies trespassing undue disciplinary boundaries and experimenting a place based approach that can innovate and integrate planning regulations strategic spatial visioning and urban development projects Moreover the place making challenge compels urban experts and policy makers to critically reflect upon the physical and social contexts of their interventions In this sense facing place making today is a way to renew the civic and social role of urban planning and urban design

Institutional Change and Economic Development Ha-Joon Chang, 2007-11-15 Institutional Change and Economic Development discusses not just theoretical issues but a diverse range of real life institutions political bureaucratic fiscal financial corporate legal social and industrial in the context of dozens of countries across time and space spanning Britain Switzerland and the USA in the past to Botswana Brazil and China today

Capacity for Development Carlos Lopes, Khalid Malik, Sakiko Fukuda-Parr, 2013-06-17 The United Nations system was a pioneer in the field of technical cooperation and capacity development is its central mandate UNDP has long played an important leadership role in both as a source of technical cooperation funds and advisory services and as the home of innovative intellectual research and analysis on how to make them more efficient and effective This book presents a vision that builds on new possibilities for knowledge sharing for which the revolution in information and communications technologies offers ample opportunities a vision that is firmly founded on genuine ownership by the ultimate beneficiaries of development efforts the government and citizens of developing countries From the Foreword by MARK MALLOCH BROWN Administrator UNDP Capacity for Development brings together innovative and well supported studies of technical cooperation along with its potential to build sustainable capacities in developing countries by enhancing the knowledge skills and productive aptitudes of their populations A team of eminent development professionals and economists examine the achievements of technical cooperation and offer recommendations for reform in the context of globalization democratisation the information revolution and the growth of capacities in the South They analyse the issues from three perspectives ownership capacity enablers and knowledge The team show how the complex processes involved can be restructured to produce local involvement and empowerment set out a normative framework for the input from society and describe a new paradigm of knowledge for capacity building in the network age This book will be essential reading for all development professionals and policy makers as well as providing an invaluable research and teaching resource
