A Big Elephant Has Been Killed:

A Big Elephant Has Been Killed Yaw O. Agyeman, 2003-03-16 *A Big Elephant Has Been Killed* is a deeply moving and gripping narrative that interweaves stories of ordinary friendships and love's lost promises with a discussion of society and politics in contemporary Ghana. Although Ghana provides the setting, the novel foregrounds a range of issues relevant to Africa and the black Diaspora as a whole. Badly disillusioned from their years of youthful idealism, a group of friends clings with fleeting solace to their vision for their country through their discussions on poverty, pan-Africanism, underdevelopment, religious identity, social revolution, and Africa's relationship with the West. But the challenges of their daily existence compel them to question the ethics and relevance of their idealism and eventually lead to the desperate decision to steal from the Big Elephant in the penultimate gamble to empower themselves as agents of social transformation.

Hunting the Elephant in Africa Captain C. H. Stigand, 2013-12-10 Travel through wild Africa with Col Stigand as he hunts elephant, rhino, lion, and antelope like the hunters of old used to do. There is something so fascinating and absorbing about elephant hunting that those who have done much of it can seldom take any interest again in any other form of sport. It seems so vastly superior to all other big game shooting that once they have surrendered themselves to its charms, they cannot even treat any other form of hunting seriously. Everything else seems little and insignificant by comparison. Invaluable safari and hunting advice.

From the Foothills of the Himalayas Nancy W. Axinn, 2008 Back before cell phones, computers, e-mail, and even bridges in the Chitwan Valley in Nepal, Nancy Axinn and her husband worked with agricultural education programs. *From the Foothills of the Himalayas* is written upon reflection of the notes and letters Axinn penned from 1976 to 1978 while living in rural Nepal. Axinn's small notebook was never out of reach as she traveled in Nepal. Setting off on nearby roads, Axinn climbed steep mountain trails, often wading through rivers to reach the remote schools where she coached prospective teachers of agriculture. Contact with the outside world was by letter, so after each one was written, it went by road or local plane to Axinn's office at Tribhuvan University in Kathmandu. It was then sent by air mail to her daughter in the United States. *From the Foothills of the Himalayas* provides a firsthand account of the spectacular countryside of rural Nepal, Axinn's agricultural work in the area, and her challenges in cultural adaptation.

Don't Kill Me Ramani Ranjan Khuntia, 2021-03-17 *Don't Kill Me* contains adventures of life-risking confrontations with animals. Stories of how the young generation during their school and college period take revenge on people for a very small incident and how that small incident escalates to a big, bloody episode with many losing their lives. In some instances, young people tried dangerous and life-risking activities to prove their potential. There are untold stories of birds and how they bond with human beings; how one lovely couple is being separated by society in the name of caste; how people are so cruel to animals and how they are slowly, gradually, yet prominently killing them. An account of how ancient people lived in miserable conditions, the experience of life in bullock carts and wooden boats. Stories that narrate how the bonds between people and animals are just like with our families; the tale of why crocodiles do not

attack wooden boats how houses were built and completely ruined after fires and how people came together to help one another during calamities *The Michigan Alumnus* ,2003 In v 1 8 the final number consists of the Commencement annual

Big Game of Botswana Clive Spina,2024-06-13 Quoting contemporary accounts from hunters missionaries and traders from the early nineteenth century onwards this book illustrates the ecology of the country as it was emphasizing its rich large mammal fauna its decline from increasing aridity of the country its destruction by hunters by disease and most importantly destruction of its vast herds notably of wildebeest due to the developing beef export economy and the erection of veterinary cordon fences depriving the large game of migration routes in times of drought Once possessing one of the greatest animal displacements in Africa with huge migrations of antelope this book underlines the reality that the fauna of Botswana today is but a tiny remnant of what was perhaps once one of the the greatest spectacles of big game on earth It shows how the decline came about and the controls exercised by tribal chiefs illustrating the indigenous peoples attitudes and eventual protective measures both tribal and statutory Whereas the pessimistic predictions of extinction at the end of the nineteenth century have happily not come true nonetheless the continued existence of this once great fauna is increasingly threatened by climate change threatening an already fragile balance and human population increase with its increasing economic demands and changes in land use The study fills a gap in the literature of African wildlife conservation and is distinctive by drawing upon a rich historical background

The Game of Conservation Mark Cioc,2009-11-15 The Game of Conservation is a brilliantly crafted and highly readable examination of nature protection around the world Twentieth century nature

conservation treaties often originated as attempts to regulate the pace of killing rather than as attempts to protect animal habitat. Some were prompted by major breakthroughs in firearm techniques such as the invention of the elephant gun and grenade harpoons but agricultural development was at least as important as hunting regulations in determining the fate of migratory species. The treaties had many defects yet they also served the goal of conservation to good effect often saving key species from complete extermination and sometimes keeping the population numbers at viable levels. It is because of these treaties that Africa is dotted with large national parks that North America has an extensive network of bird refuges and that there are any whales left in the oceans. All of these treaties are still in effect today and all continue to influence nature protection efforts around the globe. Drawing on a wide variety of primary and secondary sources Mark Cioc shows that a handful of treaties all designed to protect the world's most commercially important migratory species have largely shaped the contours of global nature conservation over the past century. The scope of the book ranges from the African savannas and the skies of North America to the frigid waters of the Antarctic.

Dharmarajan,Keerti Ramachandra,2006 *Jungle Lore* Jim Corbett,2018-01-01 Jim Corbett is famous for his exploits as a hunter but there was so much more to the man than tracking down man eating tigers and leopards. In fact Carpet Sahib as many Indians called him was a conservationist at heart with a deep love for jungles its flora and fauna and its inhabitants the birds and the animals and the people who lived in the lush Kumaon hills. It is this side of Corbett that comes to the fore in *Jungle Lore*. Almost autobiographical in nature *Jungle Lore* sees Corbett talk of his boyhood the people he met lessons he learnt in absorbing the jungle his concern for the jungles and environment and of course there are doses of hunting expeditions too. There is even the odd story of detection and of supernatural sightings. *Jungle Lore* is the first book anyone should read on Jim Corbett. Simply because it is about Jim Corbett the man who went on to become a famous hunter.
