**The Hi-Tech Civilizations** , The Conscious Planet Neil M. Pine,2013-07 The writing of this book was both a spiritual and intellectual journey It took more than ten years to complete while having to be revised and updated constantly Th is is no holds barred literature where the author says what he means and means what he says He does not mintz his words Th e Conscious Planet thinks outside the box and breaks all the rules of traditional thinking Sometimes this information can be brutally honest or painfully real Th is author is not trying to win any popularity contest He tells it like it really is and doesn t care what anyone thinks Th e Conscious Planet is what the government and big corporations who control it don t want you to know It is the truth about the truth and nothing but the truth so help me In the modern world people only know what multinational corporations want them to know not what they should know and it is this tainted knowledge which is creating a society of pathetic drones who like poor doomed sheep are too busy just trying to survive to see that the wool is being pulled over their eyes while being led to slaughter Because these corporate imperatives are being paid for at the expense of the future of mankind Before you patronize any product be conscious about what it s doing to your health to the earth and how it will aff ect future generations Skeptics have warned the author that this book will receive nominal success that it represents a small niche market and not everyone would be interested in such literature

and in retort to this assertion it should be acknowledged that yes it is sadly true that not everyone would be interested in this book because the information herein may not pertain directly to their life or general well being So in understanding who would be interested in this book let s narrow it down by eliminating the types of individual who would not directly benefit x 1 People who are immortal Yes these people might not care about this book heck if you were immortal you might eat Twinkies and cheese burgers all day long 2 People who have another planet to live on Th is is true why would they care if the world goes to hell in a hand basket See Ya Well lucky them however for the other seven billion people who inhabit the planet earth who are not immortal and who don t have another planet to live on then this book is absolutely the most important book they may ever read Become a part of the Conscious Planet *Canadian Florist, Greenhouse and Nursery* ,1987 **Hamilton's The Art of High-tech Watering** David L.
