The Art of Persuasion in Greece George Alexander Kennedy, 1966 History of Rhetoric, Volume I George A. Kennedy, 2015-12-08 A concern for the art of persuasion as rhetoric was anciently defined was a principal feature of Greek intellectual life In this study of the complex of subjects labeled rhetoric the author explores rhetorical theory and practice from the fifth to the first centuries B C Beginning with the creative rhetoric of the pre Socratic era the study progresses through the time of Aristotle and the Attic orators and concludes with the ossification of rhetoric into a pedantic discipline during the Hellenistic period Originally published in 1963 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Art of Persuasion in Greece** George Kennedy, 1991 The Art of Persuasion in Greece Gavin Kennedy, 1963 Greek Rhetoric Callista Papadopoulos, In the bustling agora of ancient Athens where merchants hawked their wares and citizens debated the pressing issues of the day a revolutionary art was taking shape This art would fundamentally transform not only Greek society but the entire Western intellectual tradition Greek rhetoric born from the practical needs of a democratic society emerged as the systematic study of persuasive communication establishing principles that continue to influence speakers writers and thinkers more than two millennia later The origins of Greek rhetoric can be traced to the unique political and social circumstances of the ancient Greek city states particularly Athens during the fifth and fourth centuries BCE Unlike the monarchical systems that dominated much of the ancient world Greek democracy demanded that citizens participate actively in public discourse In the Athenian assembly ordinary citizens were expected to speak on matters of war and peace taxation and public works justice and governance This democratic imperative created an urgent need for effective communication skills as the ability to persuade one's fellow citizens often determined not only individual success but the fate of the entire polis The earliest systematic approach to rhetoric emerged in Sicily during the mid fifth century BCE following the overthrow of tyrants in Syracuse and other Sicilian cities As democratic governments were established citizens who had been dispossessed during the tyrannical periods sought to reclaim their property through the courts This created a pressing need for effective legal advocacy leading Corax of Syracuse and his student Tisias to develop the first formal system of rhetorical instruction Their work though now lost established many fundamental principles that would later be refined by greater thinkers *Persuasion: Greek Rhetoric in Action* Ian Worthington, 2002-11 An exciting and accessible introduction to rhetoric and oratory in ancient Greece All Greek and Latin is translated **Literature in the Greek and Roman Worlds** Oliver Taplin, 2000 This book consists of seventeen essays by a team of international scholars exploring aspects of the

There has recently been a great deal of scholarship on the origins of rhetoric as well as on important 4th century figures such as Isocrates and Alcidas This volume focuses particularly on the generation before Aristotle wrote his *Rhetoric* the central text of ancient Greek rhetorical theory Individual papers concentrate on different aspects of the Peripatetic writings both of Aristotle and Theophrastus their thoughts on character emotion logos style and metaphor the influences of dramatic writings the relationship with Plato and with the *Rhetorica ad Alexandrum* and the historical contexts Some papers offer close readings of individual passages while others tease out information based on fragmentary references All of the papers offer original insights based on a thorough knowledge of the original texts **Isaeus** ,2009-02-17 This is the eleventh volume in the *Oratory of Classical Greece* This series presents all of the surviving speeches from the late fifth and fourth centuries BC in new translations prepared by classical scholars who are at the forefront of the discipline These translations

are especially designed for the needs and interests of today's undergraduates. Greekless scholars in other disciplines and the general public. Classical oratory is an invaluable resource for the study of ancient Greek life and culture. The speeches offer evidence on Greek moral views, social and economic conditions, political and social ideology, law and legal procedure and other aspects of Athenian culture that have recently been attracting particular interest: women and family life, slavery and religion to name just a few. The orator Isaeus lived during the fourth century BC and was said to be the teacher of Demosthenes, Athens' most famous orator. Of the fifty or more speeches he is believed to have written, eleven survive in whole or as a large fragment and others as smaller fragments. This volume presents all the surviving works of Isaeus. The speeches mainly deal with inheritances and are a vital source of information regarding Greek law in this important area. In addition to translating the speeches, Michael Edwards provides a general introduction to Isaeus and Athenian inheritance law as well as specific introductions and notes for each speech.

Oral Performance and Its Context Chris Mackie, 2017-07-31 This volume is concerned with aspects of orality and literacy in the ancient world. It arises from the tremendous contemporary interest among scholars in questions of how literacy and orality co-exist and interact in the ancient world. The contents of the book are refereed papers originally presented at the fifth biennial Orality and Literacy in ancient Greece held at The University of Melbourne in 2002. Papers are offered by scholars from Britain, the USA, Canada and Australia which deal with a range of periods and genres in antiquity from Homer through to Roman literature. The book will be of great interest to students and scholars of the ancient world.

Classical Literature Richard Rutherford, 2008-04-15 This accessible one-volume survey of the literature of Greece and Rome covers the period between Homer around 700 BC and Augustine around AD 410. Highlights what is important historically and of continuing interest and value in classical literature. An introduction by the editor presents essential information in a concise, accessible way. Each chapter focuses on a particular genre or area of literature. This structure allows readers to see continuities between different periods and to move easily between the Greek and Roman worlds. Includes extensive quotations in English. A timeline and an index of authors help to make the material as accessible as possible.

Corpora and Rhetorically Informed Text Analysis David West Brown, Danielle Zawodny Wetzell, 2023-06-15 *Corpora and Rhetorically Informed Text Analysis* explores applications of rhetorically informed approaches to corpus research. Bringing together contributions from scholars in a variety of fields, it takes up questions of how theories and traditions in rhetorical analysis can be integrated with corpus techniques in order to enrich our understanding of language use, variation and history. The studies included in this volume shed light on areas as diverse as student academic writing, political discourse and the digital humanities. These studies all make use of a dictionary-based tagger called DocuScope which recognizes tens of millions of words and phrases and slots them into categories based on their rhetorical functions. While DocuScope provides a through-line that both links the studies, various analytical procedures and primes their rhetorical insights, the volume is about more than the explanatory power of a single tool. It demonstrates

how rhetorically informed approaches can complement more established corpus methodologies underscoring their combined potential
