into new products and thus builds up the temples of science and philosophy The last mentioned authority adds Its products are twofold ideas and thoughts An idea is a mental product which when expressed in words does not give a proposition a thought is a mental product which embraces the relation of two or more ideas The ideas of the understanding are of two general classes abstract ideas and general ideas The thoughts are also of two general classes those pertaining to contingent truth and those pertaining to necessary truth In contingent truth we have facts or immediate judgments and general truths including laws and causes derived from particular facts in necessary truth we have axioms or self evident truths and the truths derived from them by reasoning called theorems *The works of James William Gilbert* James William Gilbert,1865
