The Individual in the International Legal System Kate Parlett, 2011-04-14 Kate Parlett s study of the individual in the international legal system examines the way in which individuals have come to have a certain status in international law from the first treaties conferring rights and capacities on individuals through to the present day The analysis cuts across fields including human rights law international investment law international claims processes humanitarian law and international criminal law in order to draw conclusions about structural change in the international legal system By engaging with much new literature on non state actors in international law she seeks to dispel myths about state centrism and the direction in which the international legal system continues to evolve

Legal Integration and Language Diversity C. J. W. Baaij, 2018 How can the European Union create laws that are uniform in a multitude of languages Specifically how can it attain both legal integration and language diversity simultaneously without the latter compromising the former C J W Baaij argues that the answer lies in the domain of translation A uniform interpretation and application of EU law begins with the ways in which translators and jurist linguists of the EU legislative bodies translate the original legislative draft texts into the various language versions In the European Union law and language are inherently connected The EU pursues legal integration i e the incremental harmonization and unification of its Member States laws for the purpose

of reducing national regulatory differences between Member States However in its commitment to the diversity of European languages its legislative institutions enact legislative instruments in 24 languages Language Diversity and Legal Integration assesses these seemingly incompatible policy objectives and contemporary translation practices in the EU legislative procedure and proposes an alternative source oriented approach that better serves EU policy objectives Contrary to the orthodox view in academic literature and to the current policies of the EU this book suggests that the English language version should serve as the original and only authentic legislative text Translation into the other language versions should furthermore avoid prioritizing clarity and fluency over syntactic correspondence and employ neologisms for distinctly EU legal concepts Ultimately Baaij provides practical solutions to the conflict between the equality of all language versions and the need for uniform interpretation and application of EU law

Legal Capital in Europe Marcus Lutter, 2006 Europe has known very different systems of company laws for a long time These differences do not only pertain to the board

structures of public companies where single tier and two tier structures can be distinguished they also pertain to the principles of fixed legal capital Fixed legal capital is not a traditional ingredient of English and Irish company law and had to be incorporated into these legal systems only for public limited companies according to the Second European Company Law Directive of 1976 Both jurisdictions have never really embraced these rules Against this background the British Accounting Standards Board ASB and the Company Law Centre at the British Institute of International and Comparative Law BIICL have initiated and supported a study of the benefits of this legal system by a group of experts led by Jonathan Rickford The report of this group has been published in 2004 Its result was that legal capital was costly and superfluous hence the Second Directive should be repealed The British government has adopted this view and wants the European Commission to act accordingly Against this background a group of German and European company law experts academics as well as practitioners have come together to scrutinise sense and benefits of fixed legal capital and all its specific elements guided by the following questions What is the relevant legal concept supposed to achieve What does it achieve in reality What criticisms are there Which proposals or alternatives are available From the outset the group of experts has endeavoured to cooperate with foreign colleagues which resulted in very fruitful and pleasant exchanges This volume contains besides an executive summary of the results 16 essays on specific aspects of legal capital in Germany covering also neighbouring fields of law e g accounting insolvency 7 reports on fixed legal capital in other jurisdictions France Great Britain Italy the Netherlands Poland Spain and the U S A addressing the same questions as the essays on German law The British initiative disapproves of the Second Directive The Directive does only deal with public limited companies in Europe which is reflected in the analysis presented here It is only concerned with the fixed legal capital of public limited companies not with capital issues of private companies The study has arrived at a result that differs completely from that of the Rickford group It verifies the usefulness of the concept of fixed legal capital and wishes to convince the European Commission of the benefits of the Second Company Law Directive
