Imlay,Monica Duffy Toft,2007-01-24 How do we plan under conditions of uncertainty The perspective of military planners is a key organizing framework do they see themselves as preparing to administer a peace or preparing to fight a future war Most interwar volumes examine only the 1920s and the 1930s This new volume goes back and forward in time to draw on a greater expanse of history in order to tease out lessons for contemporary planners These chapters are grouped into four periods 1815 1856 1871 1914 1918 1938 and post Second World War They progress from low tech to high tech concerns for example the first period examines armies while the second period examines navies the third assesses navies combined with air forces and finally for the Kaiser chapter explores nuclear issues and decision making **The Origins of World War I** Richard F. Hamilton,Holger H. Herwig,2003-02-24 This work poses a straightforward yet at the same time perplexing question about World War I Why did it happen Several of the oft cited causes are reviewed and discussed The argument of the alliance systems is inadequate lacking relevance or compelling force The arguments of mass demands those focusing on nationalism militarism and social Darwinism it is argued are insufficient lacking indications of frequency intensity and process how they influenced the various decisions The work focuses on decision making on the choices made by small coteries in Austria Hungary Germany Russia France Britain and elsewhere The decisions made later by leaders in Japan the Ottoman Empire Italy the Balkans and the United States are also explored The final chapters review the basic causes once again An alternative position is advanced one focused on elites and coteries their backgrounds and training and on their unique agendas Europe on the Path to Self-Destruction Jack L. Schwartzwald,2022-07-27 Between the years 1815 and 1945 Europe achieved unrivaled global dominance only to see it shattered by two world wars This frenetic rise and fall was attended by immense societal change In 1815 Europe remained largely agricultural and dependent upon horsepower By 1945 the power of the atom had been unleashed Two industrial revolutions occurred in the interim the first founded upon coal iron and steam the second upon oil steel electricity and internal combustion The implications for humanity were profound This concise yet comprehensive study is divided into three sections In section one the map of Europe emerges in its modern visage as unrestrained nationalist fervor gives rise to an assemblage of new nation states In section two the continent attains global hegemony as massive industrialization fuels a mad scramble for colonial markets and raw materials In section three a cauldron of national ethnic and class hatreds spawn the rise of totalitarianism and the overthrow of European hegemony in two calamitous world wars By tracing the events and undercurrents of this vital period in European

The Marne, 1914 Holger H. Herwig, 2009-12-01 For the first time in a generation here is a bold new account of the Battle of the Marne a cataclysmic encounter that prevented a quick German victory in World War I and changed the course of two wars and the world With exclusive information based on newly unearthed documents Holger H Herwig re creates the dramatic battle and reinterprets Germany s aggressive Schlieffen Plan as a carefully crafted design to avoid a protracted war against superior coalitions He paints a fresh portrait of the run up to the Marne and puts in dazzling relief the Battle of the Marne itself the French resolve to win and the crucial lack of coordination between Germany s First and Second Armies Herwig also provides stunning cameos of all the important players from Germany s Chief of General Staff Helmuth von Moltke to his rival France s Joseph Joffre Revelatory and riveting this is the source on this seminal event

China Goes to Sea Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China s turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China s potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China s maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China s history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China s current development trajectory Without underestimating the enduring pull of China s past as it relates to threats to the country s internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia

Dominion of Race Laura Madokoro, Francine

McKenzie, David Meren, 2017-06-09 How has race shaped Canada's international encounters and its role in the world? How have the actions of politicians, diplomats, citizens, and nongovernmental organizations reflected and reinforced racial power structures in Canada? In this book, leading scholars grapple with these complex questions, destabilizing conventional understandings of Canada in the world. *Dominion of Race* exposes how race thinking has informed priorities and policies, positioning Canada in the international community and contributing to a global order rooted in racial beliefs. While the contributors reconsider familiar topics, including the Paris Peace Conference and Canada's involvement with the United Nations, they enlarge the scope of Canada's international history by subject, geography, and methodology. By demonstrating that race is a fundamental component of Canada and its international history, this important book calls for reengagement with the histories of those marginalized in or excluded from the historical record. *Visnyk Kyivs'koho slavistychnoho universytetu*, 2007
