created by seventeen interdisciplinary authors brings together pioneering practices that introduce arts into education in Japan. The field of research ranges from kindergarten, primary and secondary school to liberal arts and postgraduate courses at university. The chapters cover both formal and informal settings such as museums and after school programs. The genres of art include visual art, performance, dance, vocal music, and drama. Arts-based or arts-inspired methods help students' artistic inquiry through creative or performative practices, leading to new findings that might not otherwise be described. Artistic practice makes students reflect on their own bodies, emotions, feelings, ways of life, and relationships with others, which leads to creative thinking. The volume is based on three new trends in art and education: 1) the development of Arts-Based Research in Japan since its introduction from abroad; 2) the introduction of art practice into academic research in various disciplines and diverse educational settings; and 3) the new trend in drama education and theatrical performance in Japan. Each chapter inspires and provokes discussion among researchers and practitioners in various educational settings on the future direction of art education in Japan and around the world.
