Partha Mitter, 1994 Partha Mitter's book is a pioneering study of the history of modern art on the Indian subcontinent from 1850 to 1922. The author tells the story of Indian art during the Raj set against the interplay of colonialism and nationalism. The work addresses the tensions and contradictions that attended the advent of European naturalism in India as part of the imperial design for the westernisation of the elite and traces the artistic evolution from unquestioning westernisation to the construction of Hindu national identity. Through a wide range of literary and pictorial sources *Art and Nationalism in Colonial India* balances the study of colonial cultural institutions and networks with the ideologies of the nationalist and intellectual movements which followed. The result is a book of immense significance both in the context of South Asian history and in the wider context of art history.

Art and Artists of Twentieth-Century China Michael Sullivan, 2023-12-22 This visually stunning book focuses on the rebirth of Chinese art in the twentieth century under the influence of Western art and culture. Michael Sullivan, recognized throughout the world as a leading scholar of Chinese art, vividly documents the conflicting pulls of traditional and Western values on Chinese art and provides 364 illustrations in color and black and white to show the great range of artistic expression and the historical processes that occurred within various movements. A substantial biographical index of twentieth-century Chinese artists is a valuable addition to the text. Sullivan discusses artists and their work against China's background of oppression and relaxation, despair and hope. He expertly conveys the diverse and at times bizarre intertwining of Chinese cultural history and art during this century. Included are the intense debates between traditionalists and reformers, the creation of the first art schools and the birth of the idea, shocking in ethnocentric China, that art is a world language that obliterates all frontiers. The scholarly traditions of classical Chinese painting, the belated discovery of Western modernism, the artistic upheaval under Communism and China's rethinking of the very nature of art all have a place in Sullivan's fascinating history. Michael Sullivan has known many of the major figures in China's modern art movement of the 1930s and 1940s and has also gained the confidence of younger artists who rose to prominence following the 1979 Peking Spring. This long-awaited book, richly documented and abundantly illustrated, is a capstone to Sullivan's work and will be enthusiastically welcomed by art lovers everywhere.
