Postmodern Time and Space in Fiction and Theory Michael Kane, 2020-01-14 Postmodern Time and Space in Fiction and Theory seeks to place the contemporary transformation of notions of space and time often attributed to the technologies we use in the context of the ongoing transformations of modernity. Bringing together examples of modern and contemporary fiction from Defoe to DeLillo, *Frankenstein* to *Finnegans Wake* and theoretical discussions of the modern and the post-modern, the author explores the legacy of modern transformations of space and time under five headings: The Space of Nature, The Space of the City, Postmodern or Most Modern Time, The Time and Space of the Work of Art in the Age of Digital Reproduction and Travel from Modernity to These five essays re-examine the meanings of modernity and its aftermath in relation to the spaces and times of the natural, the urban and the media environment. Unlocking Subconscious Genius With AI P.T. Milan, 2025-10-05 This book is not a primer on subconscious theory; rather, it explores how artificial intelligence tools and techniques can be used to unlock power of subconscious mind. Ritual is the architecture of meaning. It is the choreography of intention, the rhythm of renewal, the sacred repetition that turns chaos into coherence. Long before algorithms, humans built rituals to mark time, transform emotion and summon the divine. Today, in the age of artificial intelligence, we are rediscovering ritual not as superstition but as structure for the soul. AI ritual design is the art of using intelligent systems to create personalized, emotionally resonant routines that align the subconscious with conscious goals. It is not about automation; it is about awakening. Take Melinda Rhodes, a 47-year-old school principal in Raleigh, North Carolina. After years of burnout and emotional fatigue, she realized her mornings were reactive: emails, news alerts, rushed coffee. She began using an AI assistant to design a morning ritual: soft instrumental music at 6:30 a.m., a personalized affirmation based on her journal entries and a five-minute visualization of her school thriving. The AI adjusted the tone daily based on her mood. Within weeks, Melinda reported feeling calmer, more focused and more connected to her purpose. It wasn't just a routine, she said. It was a ceremony of becoming. In ancient traditions, rituals were designed to invoke the divine to summon clarity from chaos. Today, prompt engineering, when done with intention, can serve a similar purpose. By crafting questions that are emotionally charged, symbolically rich and open-ended, we invite the subconscious to speak through the machine. **Negative Aesthetics and Political Collapse in Eastern European and Balkan Cinema** Zoran Samardzija, 2025-07-18 Negative Aesthetics and Political Collapse in Eastern European and Balkan Cinema examines the theme of political collapse in select contemporary Eastern European and Balkan art cinema and documentaries from the late eighties to the present. Engaging with debates in Marxism and contemporary film theory about political aesthetics, the book centers around the question of whether we can imagine possible futures through negative aesthetics, which are skeptical of cinema's ability to reproduce reality in a comprehensive and unmediated manner. In particular, it analyzes examples of ambiguous art cinema and related hybrid

documentary modes in order to invite spectators to rethink how we understand and represent the unique experiences of living through the collapse of authoritarian communism and the transition to neoliberal capitalism *Negative Aesthetics and Political Collapse* ultimately argues that the skepticism about political change and representing history found in these films forms an original mode of utopian thinking In other words their negativity about their own artistic autonomy is the very thing that allows them to hint at possible futures that are unrepresentable because they exist outside of the frameworks of contemporary geopolitics and our dominant understandings of cinematic aesthetics Redefining how we understand the intersections between geopolitics art cinema aesthetics and film theory the book presents a unique synthesis of film and political theory that attempts a new understanding of cinematic aesthetics As such it will interest scholars of film theory global art cinema aesthetics regional studies of Eastern Europe and the Balkans and political science *Image &*
