Jaeger, 2012-03-19 What is the force in art C Stephen Jaeger asks that can enter our consciousness inspire admiration or imitation and carry a reader or viewer from the world as it is to a world more sublime We have long recognized the power of individuals to lead or enchant by the force of personal charisma and indeed in his award winning *Envy of Angels* Jaeger himself brilliantly parsed the ability of charismatic teachers to shape the world of medieval learning In *Enchantment* he turns his attention to a sweeping and multifaceted exploration of the charisma not of individuals but of art For Jaeger the charisma of the visual arts literature and film functions by creating an exalted semblance of life a realm of beauty sublime emotions heroic motives and deeds godlike bodies and actions and superhuman abilities so as to dazzle the humbled spectator and lift him or her up into the place so represented Charismatic art makes us want to live in the higher world that it depicts to behave like its heroes and heroines and to think and act according to their values It temporarily weakens individual will and rational critical thought It brings us into a state of enchantment Ranging widely across periods and genres *Enchantment* investigates the charismatic effect of an ancient statue of Apollo on the poet Rilke of the painter Durer's self portrayal as a figure of Christ like magnificence of a numinous Odysseus washed ashore on Phaeacia and of the black and white projection of Fred Astaire dancing across the Depression era movie screen From the tattoos on the face of a Maori tribesman to the haunting visage of Charlotte Rampling in a film by Woody Allen Jaeger's extraordinary book explores the dichotomies of reality and illusion life and art that are fundamental to both cultic and aesthetic experience *The Pacific Islands* Moshe Rapaport, 2013-05-31 *The Pacific* is the last major world region to be discovered by humans Although small in total land area its numerous islands and archipelagoes with their startlingly diverse habitats and biotas extend across a third of the globe This revised edition of a popular text explores the diverse landforms climates and ecosystems of the Pacific island region Multiple chapters written by leading specialists cover the environment history culture population and economy The work includes new or completely revised chapters on gender music logging development education urbanization health ocean resources and tourism Throughout two key issues are addressed the exceptional environmental challenges and the demographic economic political challenges facing the region Although modern technology and media and waves of continental tourists are fast eroding island cultures the continuing resilience of Pacific island populations is apparent This is the only contemporary text on the Pacific Islands that covers both environment and sociocultural issues and will thus be indispensable for any serious student of the region Unlike other reviews it treats the entirety of Oceania with the exception of Australia and is well illustrated with numerous photos and maps including a regional atlas Contributors David Abbott Dennis A Ahlburg Glenn Banks John Barker Geoffrey Bertram David A Chappell William C Clarke John Connell Ron Crocombe Julie Cupples Derrick Depledge Colin Filer Gerard J Fryer Patricia Fryer Brenden S Holland E Alison Kay David M Kennedy
