God or the Divine? Bernhard Nitsche,Marcus

Schmücker,2023-03-20 Is there a language of transcendence which does not fall under the well worn categories of monism theism pantheism biblical or pagan monotheism personal or tripersonal God or an impersonal absolute conceived as immanent and or transcendent The present set of studies from different fields of research centers on the question whether it is possible to speak at all of transcendence or a divinity and if it is under what limitations does such speech proceed In current discussion in theology and in philosophy of religion there is a pervasive awareness that the inherited terms and alternatives developed in the western tradition no longer facilitate an adequate understanding of the divine Increasing familiarity with the languages of immanence and transcendence under erasure in Hindu and Buddhist thought has further

jumbled our coordinates while holding out the promise of a more subtle and vital engagement with the matter itself of religious inquiry A further long established distinction between personal and impersonal also takes on rich new hues in Asian contexts where the very notion of person may undergo unsettling critiques Transgressing the categories of personal and impersonal points to the mystical depth of religious traditions emphasizes their openness and reintegrates essential elements of both perspectives Advancing with curiosity and caution all the contributors take seriously the diversity of historical religious traditions while nevertheless searching for a fresh language that may connect these traditions and provide a common ground of understanding

Babbitt,2014-08-14 A live issue in anthropology and development studies humanism is not typically addressed by analytic philosophers Arguing for humanism as a view about truths Humanism and Embodiment insists that disembodied reason not religion should be the target of secularists promoting freedom of enquiry and human community Susan Babbitt s original study presents humanism as a meta ethical view paralleling naturalistic realism in recent analytic epistemology and philosophy of science Considering the nature of knowledge particularly the radical contingency of knowledge claims upon causal mechanisms religious thinkers like Thomas Merton and Ivan Illich offer more scientific conceptions of practical deliberation than are offered by some non religious ethicists Drawing on philosophical sources such as Marxism Buddhism and Christianity this original study considers implications of an embodied conception of reason revealing philosophical practical and political implications     Family Therapy and Chronic Illness Joan Atwood,2017-09-08 Treatment for the chronically ill has traditionally focused on physical factors and symptoms despite the fact that chronic illness also affects life in an emotional and spiritual way The approach toward treatment described in this volume addresses all aspects of a patient s life including their interpersonal experiences and relationships presenting family therapists and family physicians as part of the same treatment team This volume thus provides a foundation for understanding the role illness plays in family systems The meaning an individual gives to an illness is profoundly influenced by and influences that person s social world In turn social culture and social networks both shape and are shaped by the individual s experiences Exploring how the meaning of chronic illness is defined tells us much about the individual s interpersonal relations and the resultant meaning given to the person s illness As a consequence family therapy must be an integral part of the treatment plan for chronically ill patients Family Therapy and Chronic Illness approaches chronic illness from a leading edge perspective This approach enables therapists to listen attentively to complicated narratives Because these stories feelings and emotions are difficult to describe the clients have demanding telling tasks while therapists have demanding listening tasks This book sends an important message not just about the chronically ill but also about their families therapists and doctors and how they can work together to develop the best treatment plan possible     *Collected Wheel Publications Volume XXII* Paul R.
