Maya Narrative Arts Karen Bassie-Sweet, Nicholas A. Hopkins, 2019-01-15 In *Maya Narrative Arts* authors Karen Bassie Sweet and Nicholas A Hopkins present a comprehensive and innovative analysis of the principles of Classic Maya narrative arts and apply those principles to some of the major monuments of the site of Palenque They demonstrate a recent methodological shift in the examination of art and inscriptions away from minute technical issues and toward the poetics and narratives of texts and the relationship between texts and images Bassie Sweet and Hopkins show that both visual and verbal media present carefully planned narratives and that the two are intimately related in the composition of Classic Maya monuments Text and image interaction is discussed through examples of stelae wall panels lintels benches and miscellaneous artifacts including ceramic vessels and codices Bassie Sweet and Hopkins consider the principles of contrast and complementarity that underlie narrative structures and place this study in the context of earlier work proposing a new paradigm for Maya epigraphy They also address the narrative organization of texts and images as manifested in selected hieroglyphic inscriptions and the accompanying illustrations stressing the interplay between the two Arguing for a more holistic approach to Classic Maya art and literature *Maya Narrative Arts* reveals how close observation and reading can be equally if not more productive than theoretical discussions which too often stray from the very data that they attempt to elucidate The book will be significant for Mesoamerican art historians epigraphers linguists and archaeologists

[Journey to the Republic of Guatemala; Land of the Maya](#) Kalman Dubov, 2023-05-10 The Central American country of Guatemala was populated by the Maya people whose empire extended from Honduras to the south to today's southern Mexico Remnants of their presence are found throughout this region with monumental architecture cities palaces and great pyramids Wherever one looks the explosion of growth and development

captures the viewer in its thrall Even the many glyphs adorning these sites with their unique writing style are a marvel to behold They lived here for an estimated two thousand years and then in the early 16th century the Spanish came and conquered these people By then their greatness had already ended in the midst of the 10th century when their culture and civilization collapsed But they retained their culture by way of thousands of pictographic books which detailed their way of life and their advancements But the Spaniards zealous in their Catholicism sought out and destroyed every such book they could find and burned them all Except for three such books known as the Maya Codices Historians and scholars began the slow process of deciphering the Maya past Great effort was expended and the reality of their lives culture kings wars and daily practice began to emerge And the world was astounded by the emerging picture Perhaps a first in the world was their mathematical calculation with zero a phenomenal achievement Interestingly the glyph of the zero depicted a woman what mathematical genius was she to use zero in calculations Their astronomy of the heavenly spheres was astoundingly precise as was their knowledge of geometry and trigonometry Their religion however included human sacrifices following the practice of other nearby civilizations such as the Aztecs the Inca in South America and others The Spaniards stopped such worship and offerings and now subjugated these people into serfdom called encomiendas or enforced working for the conquistadors and their descendants Independence from Spain came in 1821 but the Mayan living conditions did not change The country became divided between the Spanish descendants now known as the Criollos the middle class known as Ladinos not to be confused with Jews in 9th century Castilian Spain and the Maya and other indigenous The social distance from the upper to lower classes was immense And that distance came forward during Guatemala's Civil War from 1960 to 1996 The violence and massacres during this period was so evil the president of the country Rios Montt was charged and convicted of Genocide the first time a country charged its own leader with this crime At a previous age and time the face of Guatemala presented immense achievements Today violence crime and cultural penury is self evident Guatemala is a third world country where the majority of its people live in great poverty while the upper class has the land its abundance and vast wealth

Mesoamerican Memory Stephanie Wood, Amos Megged, 2012-11-08 Euro Americans see the Spanish conquest as the main event in the five century history of Mesoamerica but the people who lived there before contact never gave up their own cultures Both before and after conquest indigenous scribes recorded their communities histories and belief systems as well as the events of conquest and its effects and aftermath Today the descendants of those native historians in modern day Mexico and Guatemala still remember their ancestors stories In Mesoamerican Memory volume editors Amos Megged and Stephanie Wood have gathered the latest scholarship from contributors around the world to compare these various memories and explore how they were preserved and altered over time Rather than dividing Mesoamerica s past into pre contact colonial and modern periods the essays in this volume emphasize continuity from the pre conquest era to the present underscoring the ongoing importance of indigenous texts in creating and preserving community identity history and memory In addition to Nahua and Maya recollections contributors examine the indigenous traditions of Mixtec Zapotec Tarascan and Totonac peoples Close analysis of pictorial and alphabetic manuscripts and of social and religious rituals yields insight into community history and memory political relations genealogy ethnic identity and portrayals of the Spanish invaders Drawing on archaeology art history ethnology ethnohistory and linguistics the essays consider the function of manuscripts and ritual in local regional and now national settings Several scholars highlight direct connections between the collective memory of indigenous communities and the struggles of contemporary groups Such modern documents as land titles for example gain legitimacy by referring to ancestral memory Crossing disciplinary methodological and temporal boundaries Mesoamerican Memory advances our understanding of collective memory in Mexico and Guatemala Through diverse sources pictorial and alphabetic archaeological archival and ethnographic readers gain a glimpse into indigenous remembrances that without the research exhibited here might have remained unknown to the outside world

Archaeoastronomy and the Maya Gerardo Aldana y Villalobos, Edwin L. Barnhart, 2014-05-30 Archaeoastronomy and the Maya illustrates archaeoastronomical approaches to ancient Mayan cultural production The book is contextualized through a history of archaeoastronomical investigations into Mayan sites originating in the 19th century discovery of astronomical tables within hieroglyphic books Early 20th century archaeological excavations revealed inscriptions carved into stone that also preserved astronomical records along with architecture that was built to reflect astronomical orientations

These materials provided the basis of a growing professionalized archaeoastronomy blossoming in the 1970s and expanding into recent years. The chapters here exemplify the advances made in the field during the early 21st century as well as the ongoing diversity of approaches presenting new perspectives and discoveries in ancient Mayan astronomy that result from recent studies of architectural alignments, codices, epigraphy, iconography, ethnography, and calendrics. More than just investigations of esoteric ancient sciences, studies of ancient Mayan astronomy have profoundly aided our understanding of Mayan worldviews. Concepts of time and space, meanings encoded in religious art, intentions underlying architectural alignments, and even methods of political legitimization are all illuminated through the study of Mayan astronomy.

Art Crime in Context Naomi Oosterman, Donna Yates, 2022-11-23. This book brings together empirical and theoretical case study research on art and heritage crime. Drawn from a diverse group of researchers and professionals, the work presented explores contemporary conceptualisations of art crime within broader contexts. In this volume, we see art in its usual forms for art crime scholarship in paintings and antiquities. However, we also see art in fossils and in violins, chairs, and jewellery holes in the ground, and even in the institutions meant to protect any or all of the above. And where there is art, there is crime. Chapters in this volume alternatively zoom in on specific objects, on specific locations, and on specific institutions, considering how each interacts with the various conceptions of crime that exist in those contexts. This volume challenges the boundaries of what we understand as art and heritage crimes and displays that both art and criminality related to art is creative and unpredictable.

Indian Art of the Americas at the Art Institute of Chicago Richard F. Townsend, 2016-06-28. A stunning survey of the indigenous art, architecture, and spiritual beliefs of the Americas from the Precolumbian era to the 20th century. This landmark publication catalogues the Art Institute of Chicago's outstanding collection of Indian art of the Americas, one of the foremost of its kind in the United States. Showcasing a host of previously unpublished objects dating from the Precolumbian era to the 20th century, the book marks the first time these holdings have been comprehensively documented. Richard Townsend and Elizabeth Pope weave an overarching narrative that ranges from the Midwestern United States to the Yucatán Peninsula to the heart of South America. While exploring artists' myriad economic, historical, linguistic, and social backgrounds, the authors demonstrate that they shared both a deep underlying cosmological view and the desire to secure their communities' prosperity by affirming connections to the sacred forces of the natural world. The critical essays focus on topics that bridge traditions across North Central and South America, including materials, methods of manufacture, the diversity of stylistic features, and the iconography and functions of various objects. Gorgeously illustrated in color with more than 500 vibrant images, this handsome catalogue serves as the definitive survey of an unparalleled collection.

Yaxchilan Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again perhaps forever This urgency underlies Yaxchilan The Design of a Maya Ceremonial City Carolyn Tate s comprehensive catalog and analysis of all the city s extant buildings and sculptures During a year of field work Tate fully documented the appearance of the site as of 1987 For each sculpture and building she records its discovery present location condition measurements and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds Line
