We Are Made of Stories Leslie Umberger,2022-10-04 A richly illustrated history of self taught artists and how they changed American art Artists without formal training who learned from family community and personal journeys have long been a presence in American art But it wasn t until the 1980s with the help of trailblazing advocates that the collective force of their creative vision and bold self definition permanently changed the mainstream art world In *We Are Made of Stories* Leslie Umberger traces the rise of self taught artists in the twentieth century and examines how despite wide ranging societal racial and gender based obstacles they redefined who could be rightfully seen as an artist and revealed a much more diverse community of American makers Lavishly illustrated throughout *We Are Made of Stories* features more than one hundred drawings paintings and sculptures ranging from the narrative to the abstract by forty three artists including James Castle Thornton Dial William Edmondson Howard Finster Bessie Harvey Dan Miller Sister Gertrude Morgan the Philadelphia Wireman Nellie Mae Rowe Judith Scott and Bill Traylor The book centralizes the personal stories behind the art and explores enduring themes including self definition cultural heritage struggle and joy and inequity and achievement At the same time it offers a sweeping history of self taught artists the critical debates surrounding their art and how museums

have gradually diversified their collections across lines of race gender class and ability Recasting American art history to embrace artists who have been excluded for too long *We Are Made of Stories* vividly captures the power of art to show us the world through the eyes of another Published in association with the Smithsonian American Art Museum Exhibition Schedule Smithsonian American Art Museum Washington DC July 1 2022 March 26 2023 **Contact: Art and the Pull of Print**

Jennifer L. Roberts, 2024-05-14 A leading art historian presents a new grammar for understanding the meaning and significance of print In process and technique printmaking is an art of physical contact From woodcut and engraving to lithography and screenprinting every print is the record of a contact event the transfer of an image between surfaces under pressure followed by release Contact reveals how the physical properties of print have their own poetics and politics and provides a new framework for understanding the intelligence and continuing relevance of printmaking today Focusing on the material and spatial transformations of the printmaking process rather than its reproducibility this beautifully illustrated book explores the connections between print painting and sculpture but also between the fine arts industrial arts decorative arts and domestic arts Throughout Roberts asks what artists are learning from print and what we in turn can learn from them

Bernardino Poccetti and the Art of Religious Painting at the End of the Florentine Renaissance Douglas Dow, 2025-10-01 By almost any measure Bernardino Barbatelli called Poccetti was a successful and sought after painter in late sixteenth century Florence but his works have remained largely overlooked This study situates representative examples of his religious painting within their respective contexts to demonstrate how Poccetti and his patrons negotiated the increasingly fraught terrain of sacred painting in the period of religious reform These case studies demonstrate how patrons ranging from the Dominicans to the Carthusians to prominent Florentine patricians relied on Poccetti's skill in creating compelling narratives that reflected current concerns within the Catholic world In the process Poccetti invoked an august Florentine tradition of fresco painting shaping it to better address the demands placed on religious imagery at the end of the Renaissance *The Arts of the Anglican Counter-Reformation* Graham Parry, 2006 A wide ranging survey of the brief revival of religious art architecture music and literature during the Counter Reformation **Seafaring in the Arabian Gulf and Oman**

Dionisius A. Agius, 2012-12-06 This book is a study of the seafaring communities of the Arabian Gulf and Oman in the past 150 years It analyses the significance of the dhow and how coastal communities interacted throughout their long tradition of seafaring In addition to archival material the work is based on extensive field research in which the voices of seamen were recorded in over 200 interviews The book provides an integrated study of dhow activity in the area concerned and examines the consciousness of belonging to the wider culture of the Indian ocean as it is expressed in boat building traditions navigational techniques crew organisation and port towns People of the Dhow brings together the different measures of time past the sea its people and their material culture The Arabian Gulf and Oman have traditionally shared a common destiny within the Western Indian Ocean The seasonal monsoonal winds were fundamental to the physical and
