**The Mobility of Modernism** Harper Montgomery,2017-07-04 Arvey Foundation Book Award Association for Latin American Art 2018 Many Latin American artists and critics in the 1920s drew on the values of modernism to question the cultural authority of Europe Modernism gave them a tool for coping with the mobility of their circumstances as well as the inspiration for works that questioned the very concepts of the artist and the artwork and opened the realm of art to untrained and self taught artists artisans and women Writing about the modernist works in newspapers and magazines critics provided a new vocabulary with which to interpret and assign value to the expanding sets of abstracted forms produced by these artists whose lives were shaped by mobility The Mobility of Modernism examines modernist artworks and criticism that circulated among a network of cities including Buenos Aires Mexico City Havana and Lima Harper Montgomery maps the

dialogues and relationships among critics who published in avant gardist magazines such as Amauta and Revista de Avance and artists such as Carlos Merida Xul Solar and Emilio Pettoruti among others who championed esoteric forms of abstraction She makes a convincing case that for these artists and critics modernism became an anticolonial stance which raised issues that are still vital today the tensions between the local and the global the ability of artists to speak for blighted or unincorporated people and above all how advanced art and its champions can enact a politics of opposition

Making Art Concrete Pia Gottschaller, Aleca Le Blanc, Zanna Gilbert, Thomas Learner, Andrew Perchuk, 2017-09-16 In the years after World War II artists in Argentina and Brazil experimented with geometric abstraction and engaged in lively debates about the role of the artwork in society Some of these artists used novel synthetic materials creating objects that offered an alternative to established traditions in painting proposing that these objects become part of everyday concrete reality Combining art historical and scientific analysis experts from the Getty Conservation Institute and Getty Research Institute are collaborating with the Colección Patricia Phelps de Cisneros a world renowned collection of Latin American art to research the formal strategies and material decisions of these artists working in the concrete and neo concrete vein Making Art Concrete presents works by Lygia Clark Willys de Castro Judith Lauand Ral Lozza Helio Oiticica and Rhod Rothfuss among others with spectacular new photography The photographs along with

information about the now invisible processes that determine the appearance of these works are key to interpreting the artists technical choices as well as the objects themselves Indeed this volume sheds further light on the social political and cultural underpinnings of the artists propositions making a compelling addition to the field of postwar Latin American art
