Neurosurgery of Arteriovenous Malformations and Fistulas Robert Schmid-Elsaesser, Alexander Muacevic, Hartmut Brückmann, Berndt Wowra, 2012-12-06

Arteriovenous malformations AVM and fistulas AVF differ from all other pathology affecting the central nervous system by their high flow arteriovenous shunts Permanent occlusion of these shunts is the essence and the challenge of therapy Much progress has been made since the first neurosurgical efforts to deal with these problems Endovascular therapy and radiosurgery became accepted alternatives or adjuncts to surgery In many instances the choice of the primary therapeutic modality is not clear and arguments can be found for several options However microsurgery endovascular therapy and radiosurgery differ very much with regard to invasiveness length of stay at the hospital but also residual risk after therapy These secondary factors are often decisive for the choice of treatment modality The book presents in a clearly structured way the modern treatment concepts It has been written for all colleagues involved in surgery radiosurgery and endovascular therapy of neurovascular malformations

Brain Arteriovenous Malformations Vladimír Beneš, Ondřej Bradáč, 2017-10-06 This book reviews the natural course of arteriovenous malformation AVM disease and the active treatment modalities These are compared with surgical and neuropsychological results achieved at the Military University Hospital Prague Czech Republic Based on these comparisons treatment recommendation for AVM is articulated Furthermore the long term efficacy of different treatment is discussed This book is written by an international group of European authors and is aimed at neurovascular surgeons and neurosurgical residents
