Forthcoming Books Rose Arny, 2003 *Design and Distribution of Late Medieval Manuscripts in England*

Margaret Connolly, Linne R. Mooney, 2008 New essays on late medieval manuscripts highlight the complicated network of their production and dissemination One of the most important developments in medieval English literary studies since the 1980s has been the growth of manuscript studies Long regarded as mere textual repositories and treated superficially by editors manuscripts are now acknowledged as centrally important in the study of later medieval texts The essays collected here discuss aspects of the design and distribution of manuscripts in late medieval England with a particular focus on vernacular manuscripts of the late fourteenth fifteenth and early sixteenth centuries Those in the first half consider material evidence for scribal decisions about design these range from analysis of individual codices to broader discussions of particular types of manuscripts both religious and secular Later essays look at the evidence for the production and distribution of manuscripts of specific English texts or types of text These include the major Middle English poems The Canterbury Tales and Piers Plowman as well as key religious works such as Love's Mirror Hilton's Scale of Perfection the Speculum Vitae and The Prick of Conscience all of which survive in significant numbers of manuscripts The comparison of secular and devotional texts illuminates shared networks of production and dissemination and increases our knowledge of regional and metropolitan book production in the period before printing Contributors DANIEL W MOSSER JACOB THAISEN TAKAKO KATO SHERRY L REAMES AMELIA GROUNDS ALEXANDRA BARRATT JULIAN M LUXFORD LINNE R MOONEY MICHAEL G SARGENT JOHN J THOMPSON MARGARET CONNOLLY RALPH HANNA GEORGE R KEISER **Practical Text Mining with Perl** Roger Bilisoly, 2011-09-20 Provides readers with the methods algorithms and means to perform text mining tasks This book is devoted to the fundamentals of text mining using Perl an open source programming tool that is

freely available via the Internet www.perl.org. It covers mining ideas from several perspectives: statistics, data mining, linguistics and information retrieval, and provides readers with the means to successfully complete text mining tasks on their own. The book begins with an introduction to regular expressions, a text pattern methodology and quantitative text summaries, all of which are fundamental tools of analyzing text. Then it builds upon this foundation to explore Probability and texts, including the bag of words model, Information retrieval techniques such as the TF-IDF similarity measure, Concordance lines and corpus linguistics. Multivariate techniques such as correlation, principal components analysis and clustering, Perl modules, German and permutation tests. Each chapter is devoted to a single key topic and the author carefully and thoughtfully introduces mathematical concepts as they arise, allowing readers to learn as they go without having to refer to additional books. The inclusion of numerous exercises and worked out examples further complements the book's student friendly format.

Practical Text Mining with Perl is ideal as a textbook for undergraduate and graduate courses in text mining and as a reference for a variety of professionals who are interested in extracting information from text documents.

Data Visualization and Storytelling with Tableau Mamta Mittal, Nidhi Grover Raheja, 2024-06-28. Tableau one of the most widely used visualization tools helps in illustrating the ideas of data visualization and storytelling. Through Tableau's Data Visualization and Storytelling feature, aspiring data scientists and analysts can develop their visual analytics skills and use them in both academic and business contexts. Data Visualization and Storytelling with Tableau enables budding data analysts and data scientists to develop and sharpen their skills in the field of visual analytics and apply them in business scenarios as well as in academic context. This book approaches the Data Visualization workflow from a practical point of view emphasizing the steps involved and the outcomes attained. A major focus of this book is the application and deployment of real time case studies. Later chapters in this book provide comprehensive coverage for advanced topics such as data storytelling, data insights, color selection in graphs, publishing in tableau public and misleading visualizations. Thus this book emphasizes the need to visually examine and evaluate data through stories and interactive dashboards that are made up of appropriate graphs and charts. The case studies covered in this book are a natural extension of the visualization topics that are covered in each chapter. The intention is to empower readers to generate various dashboards, stories, graphs, charts, and maps to visualize and analyze data and support decision

making in business Advanced charts that are pertinent to project management operations are also thoroughly explored including comparison charts distribution charts composition charts and maps All these concepts will lay a solid foundation for data visualization applications in the minds of readers This book is meant for data analysts computer scientists engineers and industry professionals who are interested in creating different types of visualization graphs for a given data problem and drawing interesting insights from the plotted trends in order to make better business decisions in the future Features Introduces the world of Business Intelligence to readers through visualizations in Tableau Discusses the need and relevance of each business graph with the help of a corresponding real time case study Explores the art of picking a suitable graph with an appropriate color scheme for a given scenario Establishes the process of gaining relevant insights from the analysis of visualizations created Provides guidance in creating innovative dashboards and driving the readers through the process of innovative storytelling with data in Tableau Implements the concept of Exploratory Data Analysis EDA in Tableau
