Religious Knowledge James Kellenberger, 2022-11-30 This book addresses the place of religious knowledge in religion particularly within Christianity The book begins by examining the difference between the general concepts of knowledge and belief the relation between faith and knowledge and reasons why belief as faith and not knowledge is central to the Abrahamic religions The book explores the ambivalence about religious knowledge within Christianity Some religious thinkers explicitly accepted and sought religious knowledge as did St Thomas Aquinas while others notably Søren Kierkegaard cast knowledge and seeking it as incompatible with faith The book also examines two antithetical religious intuitions about knowledge both at home in the Christian tradition For one faith requires a struggle with doubt For the other faith requires a certainty that excludes doubt For the first religious knowledge would destroy faith For the second religious knowledge is compatible with faith and completes it Though the book focuses on the Christian tradition it also considers other traditions including a chapter on the place of religious knowledge in nontheistic religious traditions The final chapter examines how coming to Wisdom as personified in the Jewish and Christian traditions may be distinct from attaining religious

origins and evolution of the concept of revelation arises from an initial reappraisal of the tension between natural theology and the revealed knowledge of God or sacra doctrina Marion draws on the re definition of the notions of possibility and impossibility the critique of the reification of the subject and the unpredictability of the event in its relationship to the phenomenology of the gift This work begins and ends in the concept of revelation thus addressing the very heart and soul of Marion s theology concluding with a phenomenological approach to the Trinity that rests in the Spirit as gift Givenness and Revelation enhances not only our understanding of religious experience but enlarges the horizon of possibility of phenomenology itself

The Asymptote of Love James Kellenberger, 2018-10-16 Discusses the complexities and paradoxes of love as represented in the history of Western philosophy and Christianity In *The Asymptote of Love* James Kellenberger develops a theory of religious love that resists essentialist definitions of the term and brings into conversation historical debates on love in Western philosophy and Christian theology He argues that if love can be likened to a mathematical asymptote which is a straight line that infinitely approaches a curve but never quite reaches it then the asymptote of love reaches toward the infinite endpoint of love at its uttermost namely God s love Drawing upon a broad range of thinkers who have put forth classic debates on love such as St Augustine of Hippo Anders Nygren and St Thomas Aquinas as well as some lesser known figures in the debate such as Leo Tolstoy and Albert Schweitzer Kellenberger explains the profound connection between human agape and God s infinite love in its capacity to offer both directive guidance and to exist beyond human conception The widening of the circle of love is a rather novel contribution both from the author and from the twentieth century in general For this reason alone the book stands out in contemporary publishing Joeri Schrijvers author of *Between Faith and Belief Toward a Contemporary Phenomenology of Religious Life* *Journal of Legal Studies* ,1990

Bioethics and Secular Humanism H. Tristram Engelhardt, 2011-04-01 Bioethics is vitally important in our day because it represents the critical expression of interest in the proper use of medical science to provide health care Secular humanism is important because it is a central factor in constructing a common morality that does not make special appeal to such things as religious assumptions The argument of this book therefore will be of profound interest to all who are concerned for the well being of humanity in today s world Imagine the author says Roman Catholics and committed atheists disputing over proper abortion policies Imagine individuals who wish to organize a for profit surrogate mother service confronting individuals who view such endeavors as exploitation of women To what moral premise do they appeal Are power and influence the deciding factors or is it possible to establish certain principles to which all may appeal In answer Professor Engelhardt examines the various meanings of secularity and humanism clearly showing how complex they are Alongside this he demonstrates the diversity of bioethics and the problems of laying a foundation for it Based on these considerations he identifies which ways forward are the most promising The urgency of the task is clear New biomedical possibilities are surfacing at the very time that demands to contain health care costs pose difficult ethical problems

Rhetoric and Human Consciousness Craig R. Smith, 2017-04-12 For two decades students and instructors have relied on award winning author Craig Smith s detailed description and analysis of rhetorical theories and the historical contexts for major thinkers who advanced them He employs key themes from important philosophical schools in this well researched chronicle of rhetoric and human consciousness One is that rhetoric is a response to uncertainty The modern philosophers like the naturalists of ancient Greece and the Scholastics who preceded them tried to end uncertainty by combining the discoveries of science and psychology with rationalism Their aim was

progress and a consensus among experts as to what truth is However where modernism proved ineffective rhetoric was revived to fill the breach Another significant theme is that different conceptions of human consciousness lead to different theories of rhetoric and for every major school of thought another school of thought forms in reaction Classic and contemporary examples demonstrate the usefulness of rhetorical theory especially its ability to inform and guide By providing probes for rhetorical criticism discussions also demonstrate that rhetorical criticism illustrates verifies and refines rhetorical theory Thus the synergistic relationship between theory and criticism in rhetoric is no different than in other arts Theory informs practice analysis of successful practice refines theory Smith s absorbing study has been expanded to include thorough treatments of rhetoric in the Romantic Era feminist and queer theory and historical context for the creation of rhetorical theory and its use in public address

Seeds of Virtue and Knowledge Maryanne Cline Horowitz, 1997-12-08 In this wide ranging and thought provoking study Maryanne Cline Horowitz explores the image and idea of the human mind as a garden under the proper educational cultivation the mind may nourish seeds of virtue and knowledge into the full flowering of human wisdom This copiously illustrated investigation begins by examining the intellectual world of the Stoics who originated the phrases seeds of virtue and seeds of knowledge Tracing the interrelated history of the Stoic cluster of epistemological images for natural law within humanity reason common notions sparks and seeds Horowitz presents the distinctive versions within the competing movements of Hellenistic Judaism and early Christianity Augustinian and Thomist theologies Christian mysticism and Kabbalah and Erasmian Catholicism and the Lutheran Reformation She demonstrates how the Ciceronian and Senecan analogies between horticulture and culture basic to Italian Renaissance humanists artists and neo Platonists influence the emergence of emblems and essays among participants in the Northern Renaissance neo Stoic movement The Stoic metaphor is still visible today in ecumenical movements that use vegetative language to encourage the growth of shared values and to promote civic virtues organizations disseminate information on nipping bad habits in the bud and on turning a new leaf The author s evidence of illustrated pages from medieval Renaissance and Enlightenment texts will stimulate contemporary readers to evaluate her discovery of the premodern scientific paradigm that the mind develops like a plant
