The Blood Covenant Henry Clay Trumbull,1885 **Women in Ancient Egypt** Mariam F. Ayad,2022-11-15 Cutting edge research by twenty four international scholars on female power agency health and literacy in ancient Egypt There has been considerable scholarship in the last fifty years on the role of ancient Egyptian women in society With their ability to work outside the home inherit and dispense of property initiate divorce testify in court and serve in local government Egyptian women exercised more legal rights and economic independence than their counterparts throughout antiquity Yet their agency and autonomy are often downplayed undermined or outright ignored In Women in Ancient Egypt twenty four international scholars offer a corrective to this view by presenting the latest cutting edge research on women and gender in ancient Egypt Covering the entirety of Egyptian history from earliest times to Late Antiquity this volume commences with a thorough study of the earliest written evidence of Egyptian women both royal and non royal before moving on to chapters that deal with various aspects of Egyptian queens followed by studies on the legal status and economic roles of non royal women and finally on women s health and body adornment Within this sweeping chronological range each study is intensely focused on the evidence recovered from a particular site or a specific time period Rather than following a strictly chronological arrangement the thematic organization of chapters enables readers to discern diachronic patterns of continuity and change within each group of women Clémentine Audouit Paul Valéry University Montpellier France Anne Austin

Recent Advances in Immunology to Target Cancer, Inflammation and Infections Jagat Kanwar, 2012-05-09 Immunology is the branch of biomedical sciences to study of the immune system physiology both in healthy and diseased states Some aspects of autoimmunity draws our attention to the fact that it is not always associated with pathology For instance autoimmune reactions are highly useful in clearing off the excess unwanted or aged tissues from the body Also generation of autoimmunity occurs after the exposure to the non self antigen that is structurally similar to the self aided by the stimulatory molecules like the cytokines Thus a narrow margin differentiates immunity from auto immunity as already discussed Hence finding answers for how the physiologic immunity turns to pathologic autoimmunity always remains a question of intense interest However this margin could be cut down only if the physiology of the immune system is better understood The individual chapters included in this book will cover all the possible aspects of immunology and pathologies associated with it The authors have taken strenuous effort in elaborating the concepts that are lucid and will be of reader s interest
