Blood On The Wind:

Wind in the Blood Hernan Garcia, Antonio Sierra, Gilberto Balam, 1999-10-22 Wind in the Blood is a detailed look at Mayan medicine on Mexico's Yucatan peninsula and its similarities to Chinese traditional medicine. It was originally published in Spanish as a manual for health workers in Mayan areas to bridge the gulf between Western medical technique and Mayan medical knowledge. Mexican physicians Hernan Garcia, Antonio Sierra, and Gilberto Balam discovered that the similarities between Mayan medicine and traditional Chinese medicine were profound and helpful in their medical work.

A Flourishing Yin Charlotte Furth, 1999-03-05 This book brings the study of gender to Chinese medicine and in so doing contextualizes Chinese medicine in history. It examines the rich but neglected tradition of fuke or medicine for women over the seven hundred years between the Song and the end of the Ming dynasty. Using medical classics, popular handbooks, case histories, and belles lettres, it explores evolving understandings of fertility and menstruation, gestation and childbirth, sexuality, and gynecological disorders. Furth locates medical practice in the home where knowledge was not the monopoly of the learned physician, and male doctors had to negotiate the class and gender boundaries of everyday life. Women as healers and as patients both

participated in the dominant medical culture and sheltered a female sphere of expertise centered on but not limited to gestation and birth Ultimately her analysis of the relationship of language text and practice reaches beyond her immediate subject to address theoretical problems that arise when we look at the epistemological foundations of our knowledge of the body and its history
