Blue Collar Women:

Bitter Choices Ellen Israel Rosen, 1990-03-23 Ellen Israel Rosen presents a compelling portrait of married women who work on New England's assembly lines while they also maintain their homes and marriages. With skill and sympathy she documents the reasons these women work, their experiences on the job, in the union and at home, the sources of their job satisfaction and their management of the double day. The major issue for this segment of the labor force, Rosen suggests, is not whether to work but the availability and quality of jobs. Rosen argues that deindustrialization, plant closings and job displacement confronts blue collar women, factory workers with a bitter choice between work at lower and lower wages or no work at all. Drawing on quantitative and qualitative data from interviews with more than two hundred such women, factory workers, Rosen traces the ways in which women who do unskilled factory work have gained in self-esteem as well as financial stability from holding paid jobs. Throughout, Rosen explores the relationship between public work experiences and private family life. She analyzes the dynamics of two paycheck working class families, clarifies relationships between class and gender and explores the impact of patriarchy and capitalism on working class women. At the same time, Rosen places women's job loss within the broader economic context of global industrial transformations, demonstrating how international capital shifts to cheaper labor in developing countries as well as technological progress are changing the shape of the entire American labor force and are beginning to undermine the material and symbolic gains of the American female factory worker, the promise of market equality and progressive working conditions. This book is a significant contribution to our understanding of women's work and family lives but it is also a valuable look at the consequences of deindustrialization in America for workers, their families and their communities. Women & Work , Unbending Gender Joan Williams,2001-09-13 In *Unbending Gender* Joan Williams takes a hard look at the state of feminism in America Concerned by what she finds young women who flatly refuse to identify themselves as feminists and working class and minority women who feel the movement hasn t addressed the issues that dominate their daily lives she outlines a new vision of feminism that calls for workplaces focused on the needs of families and in divorce cases recognition of the value of family work and its impact on women s earning power Williams shows that workplaces are designed around men s bodies and life patterns in ways that discriminate against women and that the work family system that results is terrible for men worse for women and worst of all for children She proposes a set of practical policies and legal initiatives to reorganize the two realms of work in employment and households so that men and women can lead healthier and more productive personal and work lives Williams introduces a new reconstructive feminism that places class race and gender conflicts among women at center stage Her solution is an inclusive family friendly feminism that supports both mothers and fathers as caregivers and as workers **Handbook on Women Workers** United States.
