Johnston,Bernard Wailes,2012-10-30 The site of Dún Ailinne is one of four major ritual sites from the Irish Iron Age each said to form the center of a political kingdom and thus described as royal Excavation has produced artifacts ranging from the Neolithic about 5 000 years ago through the later Iron Age fourth century CE when the site was the focus of repeated rituals probably related to the creation and maintenance of political hegemony A series of timber structures were built and replaced as each group of leaders sought to claim ancient descent from a deep past and still create something unique and lasting Pam J Crabtree and Ronald Hicks provide analyses on respectively biological remains and Dún Ailinne's role in folklore myth and the sacred landscape while Katherine Moreau examines bronze and iron artifacts and Elizabeth Hamilton slag Content of this book's CD ROM may be found online at this location <http://core.tdar.org/project/376584> University Museum Monograph 129 A dictionary of photography Thomas Sutton,1858 Inventory of the Objects in the Art Division of the Museum at South Kensington South Kensington Museum Art Division,1868 The Annual of scientific discovery, or yearbook of facts in science and art ,1852 Demystifying Artificial Intelligence Emmanuel Gillain,2024-07-22 This book is intended for business professionals that want to understand the fundamental concepts of Artificial Intelligence their applications and limitations Built as a collaborative effort between academia and the industry this book bridges the gap between theory and business application demystifying AI through fundamental concepts and industry examples The reader will find here an overview of the different AI techniques to search plan reason learn adapt understand

and interact The book covers the two traditional paradigms in AI the statistical and data driven AI systems which learn and perform by ingesting millions of data points into machine learning algorithms and the consciously modelled AI systems known as symbolic AI systems which use explicit symbols to represent the world and make conclusions Rather than opposing those two paradigms the book will also show how those different fields can complement each other All royalties go to a charity Demystifying AI reveals its true power not as a mysterious force but as a tool for human progress accessible to all who seek to understand it Dr Barak Chizi Chief Data Analytics Officer KBC Group

Societies in Eclipse David S.

Brose, Robert C. Mainfort, C. Wesley Cowan, 2005-11-04 While contact with explorers missionaries and traders made a significant impact on natives of the Eastern Woodlands Indian peoples cannot be solely understood from the historical record Here in Societies in Eclipse archaeologists combine recent research with insights from anthropology historiography and oral tradition to examine the cultural landscape preceding and immediately following the arrival of Europeans The evidence suggests that native societies were in the process of significant cultural transformation prior to contact

The History of Chemistry (Complete) Thomas

Thomson, 2020-09-28 Chemistry unlike the other sciences sprang originally from delusion and superstition and was at its commencement exactly on a level with magic and astrology Even after it began to be useful to man by furnishing him with better and more powerful medicines than the ancient physicians were acquainted with it was long before it could shake off the trammels of alchymy which hung upon it like a nightmare cramping and blunting all its energies and exposing it to the scorn and contempt of the enlightened part of mankind It was not till about the middle of the eighteenth century that it was able to free itself from these delusions and to venture abroad in all the native dignity of a useful science It was then that its

utility and its importance began to attract the attention of the world that it drew within its vortex some of the greatest and most active men in every country and that it advanced towards perfection with an accelerated pace The field which it now presents to our view is vast and imposing Its paramount utility is universally acknowledged It has become a necessary part of education It has contributed as much to the progress of society and has done as much to augment the comforts and conveniences of life and to increase the power and the resources of mankind as all the other sciences put together It is natural to feel a desire to be acquainted with the origin and the progress of such a science and to know something of the history and character of those numerous votaries to whom it is indebted for its progress and improvement The object of this little work is to gratify these laudable wishes by taking a rapid view of the progress of Chemistry from its first rude and disgraceful beginnings till it has reached its present state of importance and dignity I shall divide the subject into fifteen chapters In the first I shall treat of Alchymy which may be considered as the inauspicious commencement of the science and which in fact consists of little else than an account of dupes and impostors every where so full of fiction and obscurity that it is a hopeless and almost impossible task to reach the truth In the second chapter I shall endeavour to point out the few small chemical rills which were known to the ancients These I shall follow in their progress in the succeeding chapters till at last augmented by an infinite number of streams flowing at once from a thousand different quarters they have swelled to the mighty river which now flows on majestically wafting wealth and information to the civilized world
