Macri,2003 **A Grammar of Mayan Hieroglyphs** Victoria Reifler Bricker,1986 Translating Maya Hieroglyphs Scott A.J. Johnson,2013-06-24 Maya hieroglyphic writing may seem impossibly opaque to beginning students but scholar Scott A J Johnson presents it as a regular and comprehensible system in this engaging easy to follow textbook The only comprehensive introduction designed specifically for those new to the study Translating Maya Hieroglyphs uses a hands on approach to teach learners the current state of Maya epigraphy Johnson shows readers step by step how to translate ancient Maya glyphs He begins by describing how to break down a Mayan text into individual glyphs in the correct reading order and then explains the different types of glyphs and how they function in the script Finally he shows how to systematically convert a Mayan inscription into modern English Not simply a reference volume Translating Maya Hieroglyphs is pedagogically arranged so that it functions as an introductory foreign language textbook Chapters cover key topics including spelling dates and numbers basic grammar and verbs Formal linguistic information is accessibly explained while worksheets and exercises complement and reinforce the material covered in the text Glyph blocks and phrases drawn from actual monuments illustrate the variety and scribal virtuosity of Maya writing The Maya writing system has not been fully deciphered Throughout the text

Johnson outlines and explains the outstanding disputes among Mayanists At the end of each chapter he offers sources for further reading Helpful appendices provide quick reference to vocabulary glyph meanings and calendrical data for students undertaking a translation The study of Maya glyphs has long been an arcane subject known only to a few specialists This book will change that Taking advantage of the great strides scholars have made in deciphering hieroglyphs in the past four decades Translating Maya Hieroglyphs brings this knowledge to a broader audience including archaeologists and budding epigraphers

A Resource Bibliography for the Decipherment of Maya Hieroglyph and New Maya Hieroglyph Readings John F. Harris, 1994-01-29 **An Album of Maya Architecture** Tatiana Proskouriakoff, 1976-04 With the imagination of an artist and the precision of a scientist Tatiana Proskouriakoff has captured in pictures thirty six restorations of magnificent Maya buildings as their builders saw the scenes more than a thousand years ago Facing her painting of each structure is a documented text of archaeological findings and a line drawing of the existing remains First issued by the Carnegie Institution of Washington in 1946 this important volume is returned to print in a new format by the University of Oklahoma Press **Maya Hieroglyphs Without Tears** John Eric Sidney Thompson, 1980 **Yaxchilan** Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again perhaps forever This urgency underlies Yaxchilan The Design of a Maya Ceremonial City Carolyn Tate s comprehensive catalog and analysis of all the city s extant buildings and sculptures During a year of field work Tate fully documented the appearance of the site as of 1987 For each sculpture and building she records its discovery present location condition measurements and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan More than mere documentation however the book explores the phenomenon of art within Maya society Tate establishes a general framework of cultural practices spiritual beliefs and knowledge likely to have been shared by eighth century Maya people The process of making public art is considered in relation to other modes of aesthetic expression such as oral tradition and ritual This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms in education in a semiliterate society and in developing the personal and community identities of individuals Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period Individual sculptures are attributed to the hands of single artists and workshops thus aiding in dating several of the monuments The significance of headdresses backracks and other costume elements seen on monuments is tied to specific rituals and fashions and influence from other sites is traced These analyses lead to a history of the design of the city under the reigns of Shield Jaguar A D 681 741 and Bird Jaguar IV A D 752 772 In Tate s view Yaxchilan and other Maya cities were

designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society

Time and Reality in the Thought of the Maya Miguel Leon-Portilla, 1990-09-01 In this second English language edition of one of his most notable works Miguel Leon Portilla explores the Maya Indians remarkable concepts of time At the book's first appearance Evon Z Vogt Curator of Middle American Ethnology in Harvard University predicted that it would become a classic in anthropology a prediction borne out by the continuing critical attention given to it by leading scholars Like no other people in history the ancient Maya were obsessed by the study of time Their sages framed its cycles with tireless exactitude Yet their preoccupation with time was not limited to calendrics it was a central trait in their evolving culture In this absorbing work Leon Portilla probes the question What did time really mean for the ancient Maya in terms of their mythology religious thought worldview and everyday life In his analysis of key Maya texts and computations he reveals one of the most elaborate attempts of the human mind to penetrate the secrets of existence

The Maya and Their Central American Neighbors Geoffrey E Braswell, 2014-04-16 The ancient Maya created one of the most studied and best known civilizations of the Americas Nevertheless Maya civilization is often considered either within a vacuum by sub region and according to modern political

borders or with reference to the most important urban civilizations of central Mexico Seldom if ever are the Maya and their Central American neighbors of El Salvador and Honduras considered together despite the fact that they engaged in mutually beneficial trade intermarried and sometimes made war on each other The Maya and Their Central American Neighbors seeks to fill this lacuna by presenting original research on the archaeology of the whole of the Maya area from Yucatan to the Maya highlands of Guatemala western Honduras and El Salvador With a focus on settlement pattern analyses architectural studies and ceramic analyses this ground breaking book provides a broad view of this important relationship allowing readers to understand ancient perceptions about the natural and built environment the role of power the construction of historical narrative trade and exchange multiethnic interaction in pluralistic frontier zones the origins of settled agricultural life and the nature of systemic collapse **Important Pre-Columbian and Native American Art** Heritage Auction Galleries (Dallas, Tex.),2006
