Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo Jones and Smith have pulled off a remarkable balancing act crafting a well grounded and multifaceted survey of China's rise in the context of Asian security. In a field which is often marked more by scholarly effervescence than substance the authors provide a refreshingly detailed portrait of the last two decades and fairly minded point out evidence which might support both extremes of the debates they challenge with their own third way. Frank Scott Douglas US Naval War College US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia Pacific region. Effectively employing realist theory in a fair minded treatment of regional developments the volume shows how and why power realities are more important than non material factors in determining the region's trajectory and thereby demonstrates that China's ascendancy in Asia remains complicated and conflicted. Robert Sutter George Washington University US East Asia is without question a region of huge economic political and security significance. Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia Pacific since the end of the Cold War seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations. Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states this timely book addresses the core issue in contemporary Asian politics the rise of China. The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia. It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism. As a consequence smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony. This leaves the region in the grip of a complex and potentially destabilizing security dilemma. The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations. Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book.

Scholarship Research Libraries and Global Publishing Jutta Reed-Scott, 1996 [Foreign Acquisitions Newsletter](#), 1978 [Journal of East Asian Libraries](#), 2006 *Exhibiting Chinese Art in Asia* Chui-fun Selina Ho, 2025-10-01 This volume

examines the emerging exhibition complex on Chinese art in early twentieth century China and from the mid 1950s onwards the cultural politics involved in Asia with the exhibitions of traditional and modern Chinese art in Taiwan Japan Hong Kong and Singapore It also scrutinizes the curatorial practices that have influenced the interpretation and display of Chinese art amidst the advance of media technology and heritage engagement in the twenty first century Situated within ongoing debates on global art history the volume is inclusive of multiple geo cultural perspectives and the dynamic practices that relate art tradition or heritage to more universal spatiotemporal art experience and engagement It extends the understanding of exhibitions of Chinese art not only as multiple historical processes culturally and politically negotiated and contested by contending forces and diverse actors in the region but also as creative interventions to engage people around the globe in the present

Collected Writings on Chinese Culture Tsuen-hsuei Tsien, 2011 Focuses on such topics as Chinese documents Chinese paper ink making printing cultural exchange libraries and biographies *Chinese Macrosecuritization* Juha A. Vuori, 2023-11-10 This book provides a holistic picture of Chinese global security discourses with a focus on macrosecritizations The work examines how the People's Republic of China PRC has aligned itself within global security discourses This is approached through the theory of securitization specifically by using the notion of macrosecritization as the lens for its analysis The book offers the first full account of Chinese macrosecritization discourses and alignments and it aims to discern what security speech with referent objects such as humanity civilization or nature has done in the domestic and international politics of China Specifically the work focuses on the discourses of the Cold War anti nuclear weapons climate change and the Global War on Terror which have all been postulated in the literature as macrosecritizations In addition it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of or are legitimated through macrosecritization The overall argument in the book is that the way contemporary China uses macrosecritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth This book will be of interest to students of critical security studies Chinese politics and International Relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution NonCommercial ShareAlike CC BY NC SA 4.0 International

The Balance of Power and State Policies Zhipei Chi, 2021-02-15 This book utilises publicly available materials such as US diplomatic cables leaked about a decade ago to provide an inside look at the regional dynamics between China and its East Asian neighbours It is increasingly important in this field to step out of the echo chamber of the West dominant narratives and to adopt a realistic assessment of the region There is a near consensus that East Asia is the most important region in the 21st century due to the size of its population and economy Nevertheless alarmist predictions about its future stability keep coming from pundits Indeed East Asia in the

aftermath of the Cold War might provide the most likely case study for realists to prove their pessimism about inter state relations due to historical rivalries territorial disputes economic competition great power politics and deep rooted realist beliefs among politicians in the region However East Asia has stayed defiant to these Western framings of regional dynamics People interested in East Asia and Chinese foreign policy will find this book useful in furthering their understanding of how China has interacted with other East Asian states in the post Cold War setting in light of tradition regional structure and great power competitions
