The Interdisciplinary Use of Art, Music, and

Literature in Habilitation of the Young Handicapped Child, 1978 **Play and Creativity in Art Teaching** George Szekely, 2015-03-02 In *Play and Creativity in Art Teaching* esteemed art educator George Szekely draws on his two classic volumes *Encouraging Creativity in Art Lessons* and *From Play to Art* to create a new book for new times. The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art. By observing children at play and using props and situations familiar to them, teachers can build on children's energy and self-initiated discoveries to inspire school art that comes from the child's imagination. The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher. *Play and Creativity in Art Teaching* offers plans for the study of children's play and for discovering creative art teaching as a way to bring play into the art room. While it does not offer a teaching formula or a single set of techniques to be followed, it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone. This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children.

Art in Education D. Atkinson, 2002 Distinctive and unique in its approach, this book opens up art education to the broader field of social enquiry into practice, subjectivity and identity. It draws upon important developments in contemporary philosophy and the social sciences and applies this to the professional field of art in education. It opens new perspectives for teachers, teacher educators and student teachers.

Howard Singerman's thoughtful study is the first to place that degree in its proper historical framework and ideological context. Arguing that where artists are trained makes a difference in the forms and meanings they produce, he shows how the university with its disciplined organization of knowledge and demand for language played a critical role in the production of modernism in the visual arts. Now it is shaping what we call postmodernism, like postmodernist art, the graduate university stresses theory and research over manual skills and traditional techniques of representation. Singerman, who holds an M.F.A. in sculpture as well as a Ph.D. in Visual and Cultural Studies, is interested in the question of the artist as a professional and what that word means for and about the fashioning of artists. He begins by examining the first campus-based art schools in the 1870s and goes on to consider the structuring role of women art educators and women students, the shift from the fine arts to the visual arts, the fundamental grammar of art laid down in the schoolroom and the development of professional art training in the American university. Singerman's book reveals the ways we have conceived of art in the past hundred years and have institutionalized that conception as atelier activity, as craft, and finally as theory and performance. Nearly every artist under the age of fifty in the United States today has a Master of Fine Arts degree. Howard Singerman's thoughtful study is the first to place that degree in its proper historical framework and ideological context. Arguing that where ar
